The presentation of the awards should be timed for early December and should be coordinated with the colloquium chair. The nomination format should follow closely that used by the College of Arts and Sciences. (6) Actively pursue opportunities for recognition of undergraduate and graduate students with national awards.

CHEMISTRY DAY COMMITTEE

Mark Griep (Chair), Jason Kautz, Rebecca Lai, Steve Morin, Emma Dolenshek (Building Coordinator), Kayleen Walsh (Resource Center), Rezarta Selmani (Recruiting and Communications Coordinator).

CHARGE TO THE COMMITTEE: Develop and implement the annual Chemistry Day outreach and recruiting event.

COLLOQUIUM COMMITTEE

Jiantao Guo (2012), Alex Sinitskii (2014), Jian Zhang (2016), and Steve Morin (2018), Alena Moon (2019), Hui Li (2020), Yinsheng Guo (2021), James Checco (2022), Catherine Eichhorn (2023), Jared Shaw(2024).

POLICIES, PROCEDURES AND CHARGE TO THE COLLOQUIUM COMMITTEE:

The colloquium chair's duties are summarized below. The position of colloquium chair begins the year prior to the stated term. Thus, a chair named for spring 2009 would begin selecting and inviting speakers by spring 2008 (in reality, some of the award lecture chairs may need to employ even greater preparation). The colloquium chair is responsible for coordinating submission of Research Council Visiting Scholar funding applications; deadlines and forms can be found on the Office of Research web page. During the designated year, the chair is responsible for overseeing enrollment/attendance for the associated graduate course (Chem 990), overseeing all local arrangements for the visitors, and arranging for a projectionist. The colloquium chair is also responsible for reminding the host faculty member to arrange the "student visit time". The host faculty member is responsible for choosing the "student visit time" and for ensuring good participation in the student time.

SEMINAR MEAL REIMBURSEMENT POLICY:

Participants for meals should include speaker, host and up to two faculty members. If you have more than four individuals and the amount exceeds the stated limit, you will be responsible to collect from the other faculty members and pay for that amount. The University Foundation requires an itemized meal receipt from restaurants

That identifies exactly what was ordered by each member in the party. PLEASE REQUEST THIS RECEIPT; YOUR REIMBURSEMENT IS NOT POSSIBLE WITHOUT AN ITEMIZED RECEIPT.

LUNCH: Reimbursement limit is \$60 (excluding tax and gratuity).

DINNER: Reimbursement limit is \$40/person (excluding tip and tax), to include the speaker and maximum of three faculty. Maximum of \$40 for alcoholic beverages can be purchased in addition to the meal.

NOTE: *If you choose a restaurant that is not direct billed to the department, the limits identified above still apply. If you go over the limit, faculty members will be responsible for that amount.*

Colloquium honoraria and travel reimbursements: We pay speaker's meals on campus and direct bill the hotel and airfare. We give \$250 as both a small honorarium and to cover any incidental expenses (parking, mileage or airport shuttle, snacks en route, etc.). Please word the invitation to visit to clearly indicate "airfare and local accommodations are typically direct billed to the department and, in addition, you will receive a \$250 as an honorarium and to cover any incidental travel expenses." Of course, the incidental expenses may on occasion exceed \$250 (i.e. a rental car, a hotel bill they paid out of pocket, etc.). If so, we will cover all of these "big expenses" and give the \$250 for incidentals.

COMBINED SHOP COMMITTEE

Barry Cheung, Yinsheng Guo, Jared Shaw, Kurt Wulser and another faculty member from Physics Department (Chair to stay in Physics).

CHARGE TO THE COMMITTEE: Advise Chemistry and Physics chairs and business managers on procedures and policies. Oversee hiring within shop. Review policy on charges and priorities for chemistry.

The committee may also provide technical assistance to faculty proposing new or revised courses, but this assistance does not guarantee a favorable review of the finished proposal. (3) Analyze, adjusting if necessary, co-requisites, prerequisites and published descriptions for chemistry courses. Recommend and execute additions or changes to ACE status for chemistry courses as needed. (4) Monitor the undergraduate chemistry curriculum with respect to departmental, university and American Chemical Society guidelines. Suggest improvements in overall curriculum.
