Revision history

May 2011

Standard 06.03. This document is up-issued to reflect changes in global power supply information.

March 2011

Standard 06.02. This document is up-issued to reflect changes in the procedures for cancelling Call Forward.

October 2010

Standard 06.01. This document is up-issued to support Unistim 5.0 and Avaya Communication Server Release 7.5.

June 2010

Standard 05.02. This document is up-issued to reflect changes in technical content for Call Log Options.

June 2010

Standard 05.01. This document is up-issued to support Avaya Communication Server 1000 Release 7.0.

October 2009

Standard 04.01. Because of the similarity between Communication Server 1000 Release 6.0 for UNIStim 4.0 features and Release 5.5 features, UNIStim 4.0 Release 6.0 documentation is also used for Release 5.5.

June 2009

Standard 03.03. This document is up-issued to support Communications Server 1000 Release 6.0.
June 2009

Standard 03.02. This document is up-issued to support Communications Server 1000 Release 6.0.

May 2009

Standard 03.01. This document is up-issued to support Communications Server 1000 Release 6.0.

January 2009

Standard 02.04. This document is up-issued to support Communications Server 1000 Release 5.5 for UNIStim 3.0. Added technical content in the section Making a call using the Redial List.

April 2008

Standard 02.03. This document is up-issued to support Communications Server 1000 Release 5.5 for UNIStim 3.0.

May 2007

Standard 01.01. This document is up-issued to support CS 1000 Release 5.0. This document reflects the new document number.

June 2006

Standard 2.00. This document is up-issued to support Communication Server 1000 Release 4.5 software. Added support for new security features.

January 2006

Standard 1.00. This document is issued to support Communication Server 1000 Release 4.5 software.

About the Avaya 1120E IP Deskphone

The Avaya 1120E IP Deskphone brings voice and data to the desktop by connecting directly to a Local Area Network (LAN) through an Ethernet connection.

In this guide, self-labeled line/programmable feature key labels appear beside the keys, and context-sensitive soft key labels appear directly above the keys. Figure 1 shows the key labels.

**Figure 1: Self-labeled feature keys and context-sensitive soft keys**

Your Avaya 1120E IP Deskphone supports the following features:

- four self-labeled line/programmable feature keys with labels and indicators
- four context-sensitive soft keys

For information about context-sensitive soft keys, see *Avaya Features and Services Fundamentals* (NN43001-106).
Note: Some Avaya 1120E IP Deskphone phones are not configured to support soft key functionality. Consult your system administrator.

- graphical, high-resolution LCD display, backlit, with adjustable contrast
- high-quality speaker phone
- volume control keys for adjusting ringer, speaker, handset, and headset volume
- six specialized feature keys:
  - Quit
  - Directory
  - Message/Inbox
  - Shift/Outbox
  - Services
  - Copy
- six call-processing fixed keys:
  - Mute
  - Handsfree
  - Goodbye
  - Expand
  - Headset
  - Hold
- gigabit Ethernet ports
- built-in gigabit Ethernet switch for shared PC access
- headset jack with an On/Off key
- USB port to support a keyboard, mouse, or wireless headset.

Note: Powered downstream 1.1-compliant USB hubs are supported, including USB 2.0 hubs, if they offer USB 1.1 backwards compliancy.

- automatic network configuration
- Graphical XAS
About the Avaya 1120E IP Deskphone

- hearing aid compatibility
- supports wideband audio when the deskphone is equipped with a wideband-capable handset. You must supply your own wideband-capable handset.
- supports wideband audio when the deskphone is equipped with a wide-band capable headset. You must supply your own wideband-capable headset.
- Accessory Expansion Module port to connect the Avaya 1100 Series IP Deskphones.

For information about using the Expansion Module, see the *Avaya 1100 Series IP Deskphones User Guide* (NN43130-101).

**Figure 2** shows the Avaya 1120E IP Deskphone.

**Figure 2: Avaya 1120E IP Deskphone**

* If supported by your server, the Data message waiting indicator provides a data alert. Contact your system administrator to find out if this feature is available for you.
About the Avaya 1120E IP Deskphone

Telephone controls

This section describes the controls on the Avaya 1120E IP Deskphone. In some geographic regions, the Avaya 1120E IP Deskphone is offered with key caps that have English text labels. In this document, text in parentheses indicates the labels that appear on the key caps, for example, (Services).

Table 1: Telephone controls

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
Use the **Volume control** buttons to adjust the volume of the ringer, handset, headset, speaker, and the Handsfree feature. Press the top button to increase the volume, and press the bottom button to decrease volume.

Your **Mute** key functionality is enabled or disabled by your system administrator. Contact your system administrator to determine if your **Mute** key is enabled.

If your **Mute** key is enabled, press the Mute key to listen to the receiving party without transmitting your voice. Press the **Mute** key again to return to two-way conversation.

*Note:* If your **Mute** key is not enabled, pressing the **Mute** key places the call on hold. Press the **Mute** key again to restore the active call or press the line key to restore the active call. You cannot retrieve this call from hold by pressing the Hold key.

The **Mute** key applies to handsfree, handset, and headset microphones.

The **Mute** LED indicator, located on the **Mute** key, flashes to indicate that the microphone is muted.

Press the **Handsfree** key to activate handsfree.

The Handsfree LED indicator, located on the **Handsfree** key, lights to indicate when handsfree is active.
Use the **Navigation** keys to scroll through menus and lists appearing on the LCD display screen. The outer part of this key cluster rocks for up, down, left, and right movements.

Use **Up** and **Down** to scroll up and down in lists, and the **Left** and **Right** keys to position the cursor. In some dialog boxes that appear on your phone, you can also use the **Left** and **Right** keys to select editable fields; press the **Right** key to select the field below the current selection, or the **Left** key to select the one above.

Press the **Enter** key, at the center of the Navigation key cluster, to confirm menu selections.

In many cases, you can use the **Enter** key instead of the **Select** soft key.

Press the **Hold** key to put an active call on hold. Tap the flashing line (DN) soft key to return to the caller on hold.

Use the **Expand** key to access external server applications.

Press the **Headset** key to answer a call using the headset or to switch a call from the handset or handsfree to the headset.

The Headset LED indicator, located on the **Handsfree** key, lights to indicate that the headset is in use.
Use the **Goodbye** key to terminate an active call.

When a message is waiting, or there is an incoming call, the red **Message Waiting\Incoming Call Indicator** LED at the top center of the IP Deskphone flashes. The flash cadence for each alert is different.

*Note:* You may also hear an audio Message Waiting Indicator (stutter or beeping dial tone) when you go off-hook.

When your Avaya 1120E IP Deskphone firmware is being updated, the blue **Feature Status Lamp** flashes.

To find out if additional features are supported, contact your administrator.

Press the **Copy** key to copy entries to your Personal Directory from other lists, such as the Caller List, Redial List, and Corporate Directory.

Press the **Quit/Stop** key to exit an active menu or dialog. Pressing the **Quit/Stop** key does not affect the status of active calls.

The **Shift/Outbox** key is a fixed key that is reserved for future feature development.
Press the **Message/Inbox** key to access your voice mailbox.

*Note*: This function is not available on all phones; consult your administrator.

Press the **Directory** key to access directory services.
Press the Services key to open the Services menu, and use the navigation keys to access the following items:

- Telephone Options:
  - Volume adjustment
  - Contrast adjustment
  - Language
  - Date/Time
  - Display diagnostics
  - Local Dialpad Tone
  - Set Info
  - Diagnostics
  - Call Log Options
  - Ring type
  - Call Timer
  - On hook default path
  - Change Feature Key Label
  - Name Display Format
  - Live Dialpad

Caller ID display order
- Normal mode indication
The Password Admin menu is not available on all Avaya 1120E IP Deskphone sets.

- Display Network Diagnostics Utilities

Only your system administrator or service provider can use Display Network Diagnostics Utilities to perform Internet diagnostics.

- Virtual Office Login and Virtual Office Logout (if Virtual Office is configured)

- Test Local Mode and Resume Local Mode (if Media Gateway 1000B is configured)

Press the Services key twice to access the Local Tools menu, and use the navigation keys to access the following items:

1. Preferences
2. Local Diagnostics
3. Network Configuration
4. Lock Menu

Your system administrator can establish a password for the Local Tools menu. If you attempt to access the Local Tools menu and a password prompt dialog box appears, contact your system administrator.
**Telephone display**

Your Avaya 1120E IP Deskphone has three display areas:

- The upper display area provides labels for the four self-labeled line/programmable feature key labels.
- The middle display area contains single-line information for items such as caller number, caller name, Call Timer, feature prompt string, user-entered digits, date and time information, and phone information.

Because the Avaya 1120E IP Deskphone only has a single-line information display area, you are prompted to scroll through any additional lines of information. For example, during an incoming call, only the Directory Number (DN) appears if the caller name is greater than 10 characters. Press the flashing arrow to display the caller name.

- The lower display area provides labels for the four context-sensitive soft keys.

**Figure 3** shows an idle LCD screen.

**Figure 3: Avaya 1120E IP Deskphone LCD screen**
License Notification

Notify your system administrator if your phone displays a message in a pop-up window about the licensing feature or evaluation period. License notification provides details to help diagnose why the features are disabled on the phone. You can press the Stop key or lift the handset to close the window. The window redisplays every 24 hours at 1:00 AM (default). The time and time frame can be configured when you provision the phone. For information about provisioning the IP Deskphones, see Avaya IP Deskphone Fundamentals (NN43001-368).

Call features and Flexible Feature Codes

Some features are not available on all IP Deskphones. Call features and Flexible Feature Codes (FFCs) must be assigned to your IP Deskphone and supported by system software. Contact your system administrator to configure these features and codes on your IP Deskphone.

Audio and text message broadcast

The Avaya 1120 IP Deskphone can display special messages in the display area of your telephone, and can play special audio messages through the speaker. Your administrator broadcasts these messages, which can be used to inform you of events like company news and weather bulletins. The message can be preceded by an audio alert (a series of beeps).

The Avaya 1120 IP Deskphone supports the following special messages:

- text: a single line of text displays. If the message is too long for the display, the message is truncated, you see an ellipsis and you cannot see the rest of the message.
- audio: an audio message streams to the telephone

When an audio message starts, the Interrupt Screen displays. While the audio message plays, you can switch to your handset or headset to listen to the message. Depending on the priority of the message, the message can barge-in during an active telephone call, during an incoming call alert, or when another message is playing.
You can also cancel the audio using the following methods:

- if listening on the speaker, pressing the Handsfree key
- if listening on the handset, placing the handset on hook
- if listening on the headset, pressing the Headset key
- by pressing the Cancel soft key
- by pressing any Line or Feature key

**Security features**

The following security features are available on your Avaya 1120E IP Deskphone:

- Using Encrypted Calling
- Managing your Station Control Password (SCPW)

**Using Encrypted Calling**

Your Avaya 1120E IP Deskphone supports secure communication using SRTP media encryption. If the feature is enabled, a security icon (を探す) is displayed on the screen when your call is secured using SRTP media encryption. Contact your system administrator to find out if this feature is available for your use.

**Managing your Station Control Password (SCPW)**

Your Station Control Password (SCPW) enables the following security features:

- Electronic Lock to prevent others from making calls from your IP Deskphone
- password-protected IP Deskphone features (for example, Personal Directory, Redial List, and Callers List)

Your system administrator defines your initial SCPW. Contact your system administrator for detailed information.
To change your password (SCPW):

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight **Password Admin**.

3. Press the **Enter** key.

4. Use the dialpad to enter your password at the prompt.

5. Press the **Up/Down** navigation keys to scroll and highlight **New Password**.

6. Press the **Enter** key.

7. Use the dialpad to enter the new password.

8. Press the **Enter** key to accept the new password.

If you are locked out of your Avaya 1120E IP Deskphone, or if you forget your SCPW, contact your system administrator.
**Note:** The default configuration for Password Protection is off.

To turn Password Protection on or off:

1. Press the *Directory* key.

2. Press the *Up/Down* navigation keys to scroll and highlight *Change Protection Mode*.

3. Use the dialpad to enter your password (if Password Protection is enabled).

4. Press the *Enter* soft key.

5. Press the *Up/Down* navigation keys to highlight one of the following:
   - Enable Password Protection
   - Disable Password Protection

6. Choose one of the following soft keys:
   - *Yes* to accept the selection
   - *No* to return to the Directory menu

7. Press the *Done* soft key.
Entering and editing text

You can enter and edit text on your Avaya 1120E IP Deskphone using the following methods:

- “Entering text using the dialpad” on page 26
- “Editing text using the soft keys” on page 27
- “Entering text using the USB keyboard” on page 28

The use of any of these methods for text entry depends on the application. Table 2 shows the applications and input devices that you can use for text entry.

**Table 2: Application text entry**

<table>
<thead>
<tr>
<th>For:</th>
<th>Use:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call Server-related applications</td>
<td>Dialpad</td>
</tr>
<tr>
<td>(for example, changing feature</td>
<td>USB keyboard for numeric entries only</td>
</tr>
<tr>
<td>key labels, adding personal</td>
<td></td>
</tr>
<tr>
<td>directory entries, or dialing)</td>
<td></td>
</tr>
<tr>
<td>Graphical applications</td>
<td>USB keyboard</td>
</tr>
<tr>
<td>Local Tools menu</td>
<td>USB keyboard</td>
</tr>
<tr>
<td></td>
<td>Dialpad for numeric entries</td>
</tr>
</tbody>
</table>

**Entering text using the dialpad**

You can use the dialpad to enter text when you use features such as Personal Directory, Redial List, and Callers List.

For example, if you want to use the letter A, press the number 2 key once. If you want the letter C, press the number 2 key three times.

*Note:* No letters are associated with the number 1 or the 0 keys.
Editing text using the soft keys

You can use soft keys to edit text when you use features such as Personal Directory, Redial List, and Callers List.

To edit an entry in your Personal Directory, press the Directory key, and select the desired entry from your Personal Directory.

To edit text with the soft keys:
1. Press the Edit soft key.
2. Press the Left/Right navigation keys to move through the text.
3. Select the appropriate editing soft key for the operation you want to perform.
4. If the character you want is not visible, press the More soft key to access the next layer of soft keys.
5. To add non-alphanumeric symbols, press the Symbol soft key, and perform the following:
   a. Press the Up navigation key to access the symbols.
   b. Press the Left/Right navigation keys to move to a specific symbol.
   c. Press the Choose soft key to select a symbol.
6. Press the Next soft key to submit your changes.

Table 3 describes the soft key editing functions on your Avaya 1120E IP Deskphone.

Table 3: Editing soft key description (Part 1 of 2)

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>

<tbody>
<tr>
<td>Cancel</td>
<td>Action is cancelled.</td>
</tr>
<tr>
<td>Choose</td>
<td>Select a non-alphanumeric symbol (available only after the Symbol soft key is selected).</td>
</tr>
<tr>
<td>Clear</td>
<td>Clear the input field.</td>
</tr>
</tbody>
</table>
Entering text using the USB keyboard

You can use the USB keyboard, when connected, to enter text in the tools and graphical applications.

For number entry in phone applications (for example, when dialing), you can use the keyboard to enter digits (0–9), as well as * and #. Other characters are ignored.

When on a call, you can use the function keys (f1, f2, f3, f4, f5, f6, f7, and f8) to control the phone. Table 4 shows the function keys and their associated action during phone calls.

### Table 3: Editing soft key description (Part 2 of 2)

<table>
<thead>
<tr>

</table>
Connecting the components

Figure 4 shows connections on the Avaya 1120E IP Deskphone.

Figure 4: Avaya 1120E IP Deskphone connections

WARNING
Ensure that the protective rubber cap on the Accessory Expansion Module port is in place when the port is not in use. Connecting anything other than the proper Avaya 1100 Series Expansion Module connector to this port can cause damage to the phone.
Before you begin

**CAUTION**
*Damage to Equipment*
Do not plug your Avaya 1120E IP Deskphone into a regular phone jack. This results in severe damage to the IP Deskphone. Consult your system administrator to ensure that you plug your phone into a 10/100/1000BaseT Ethernet jack.

**CAUTION**
Your Avaya 1120E IP Deskphone is designed for use in an indoor environment only.

Connecting the components of the phone

**WARNING**
Your Avaya 1120E IP Deskphone is shipped with the base locked in position. To avoid damaging your phone, press the wall-mount lever, located just under the Handsfree key as indicated in **Figure 5** on page 31, to release the base and pull it away from the phone.
**Figure 5:** Release the Avaya 1120E IP Deskphone from the stand

Use the following steps to connect the components of your phone.
1. Remove the stand cover. Pull upward on the center catch as indicated in Figure 6 on page 32, and remove the stand cover. The cable routing tracks are now accessible.

**Figure 6: Remove the stand cover**

![Figure 6: Remove the stand cover](image)

2. Connect the global power supply (optional). Connect the global power supply to the AC adapter jack in the bottom of the phone. Form a small bend in the cable, and then thread the adapter cord through the channels in the stand.

**WARNING**
Use only the approved Avaya Global Power Supply with your 1120E IP Deskphone (NTYS17xxE6).

**Note 1:** The Avaya 1120E IP Deskphone supports AC power or Power over Ethernet (PoE) options, including IEEE 802.3 standard power. To use PoE, where power is delivered over the CAT5 cable,
your connected LAN must support PoE. If you use PoE, you do not require an AC adapter.

**Note 2:** You must use CAT5e (or later) cables if you want to use gigabit Ethernet.

3. Install the handset. Connect the end of the handset cable with the short straight section into the handset. Connect the end of the handset cable with the long straight section to the back of the phone, using the RJ-9 handset jack marked with the symbol +. Form a small bend in the cable, and then thread the handset cord through the channels in the stand so that it exits behind the handset on the right side, in the Handset cord exit in the stand base marked, as shown in Figure 7 on page 34.

4. Install the headset (optional). If you are installing a headset, plug the connector into the RJ-9 headset jack on the back of the phone marked with the symbol , and thread the headset cord along with the handset cord through the channels in the stand, so that the headset cord exits the channel.

5. Install the Ethernet cable. Connect one end of the supplied Ethernet cable to the back of your phone using the RJ-45 connector marked with the symbol %, and thread the network cable through the channel.

6. If you are connecting your PC through the phone, you require a second CAT5e cable. Only one cable is included with the Avaya 1120E IP Deskphone package. Install the Ethernet cable connecting the PC to the phone (optional). Connect one end of the PC Ethernet cable to your phone using the RJ-45 connector and thread it through the channel. Connect the other end to the LAN connector on the back of your PC.

7. Install additional cables. If applicable, plug in optional USB devices. Connect the Ethernet cable to the LAN Ethernet connection. If you are using an AC power adapter, plug the adapter into an AC outlet.
8. Wall-mount your phone (optional). Your Avaya 1120E IP Deskphone can be mounted either by: (Method A) using the mounting holes on the bottom of the phone stand, or (Method B) using a traditional-style wall-mount box with an RJ-45 connector and a 15-cm (6-inch) RJ-45 cord (not provided).

*Complete steps 1-7, as needed, before you wall-mount your phone:*

**Method A:** Press the wall-mount lever, and pull the phone away from the stand, as shown in Figure 5 on page 31. Using the stand cover (the part you removed in step 1), mark the wall-mount holes by pressing the bottom of the stand cover firmly against the wall in the location where you wish to install the phone. Four small pins on the bottom of the stand cover make marks on the wall. Use the marks as a guideline for installing the wall-mount screws (not provided). Install the screws so that they protrude 3 mm (1/8 inch) from the wall, and then install the phone stand mounting holes over the screw heads. You may need to remove the phone from the wall to adjust the lower screws. When the lower screws are snug, install the phone on the mounting screws, and then tighten the top screws. See Figure 7 on page 34.
Method B: Attach the 15-cm (6-inch) CAT5e cable, position the stand over the mounting rivets, and slide the phone down the wall so that the rivets fit into the slots on the stand, indicated in Figure 7 on page 34 (Method B).

9. Replace the stand cover. Ensure that all cables are neatly routed and press the stand cover into place until you hear a click.

10. Put the phone in the wall-mount position (optional). If you wall-mounted your phone, put it in the wall-mount position by holding the Tilt Lever and pressing the phone towards the base until the phone is parallel with the base. Release the Tilt Lever and continue to push the phone towards the base until you hear an audible click. Ensure the phone is securely locked in position.

Replacing your narrowband handset with a wideband handset

In order to take advantage of wideband audio, you must replace the handset supplied with the deskphone with a wideband handset.

1. Obtain a wideband handset.
2. Unplug the handset supplied with the deskphone, leaving the handset cord attached to the phone.
3. Connect the handset cord to the wideband handset.

Replacing your narrowband headset with a wideband headset

In order to take advantage of wideband audio, you must replace the headset supplied with the deskphone with a wideband headset.

1. Obtain a wideband headset.
2. Unplug the headset supplied with the deskphone, leaving the headset cord attached to the phone.
3. Connect the headset cord to the wideband headset.
Connecting the components

In order to use your headset, you must configure your deskphone to recognize the headset. For information on how to configure your deskphone to use the wideband headset, see “Changing 3. Headsets” on page 83.
Virtual Private Network

A Virtual Private Network (VPN) is a network that uses a public network infrastructure, such as the Internet, to provide you with secure access to the private network of your organization.

The IP Deskphone VPN feature allows you to connect to your organization’s private network from a public or remote network. For example, you can use your home public Internet connection to connect to your organization’s private network.

This chapter describes the procedure to upgrade the software of your IP Deskphone (if required) and configure the VPN on your IP Deskphone. An installation wizard helps you perform the necessary steps.

*Note:* The Avaya Phone VPN Configuration Wizard uses the default language of the operating system of your PC. If the language is not supported by the wizard, the default wizard language is English.

Your system administrator provides you with all the necessary files you require to configure your IP Deskphone for VPN, and helps you to resolve any errors that occur during configuration.

Before you begin

Before you upgrade the IP Deskphone software and configure VPN on your IP Deskphone, complete the following checklist:

- Ensure that your PC is using one of the following operating systems:
  - Windows XP
  - Windows Vista
  - Macintosh OS
- Ensure that you received a copy of the provisioning files from your network administrator. The following files should be included:
  - Avaya Phone VPN Configuration Wizard.jar
  - provisioning files (for example: system.prv)
Virtual Private Network

• .bin files (for example: 0625C7C.bin)

• Java Virtual Machine (JVM) version 1.2 or later must be installed on your PC. Check Start, Settings, Control Panel, Java to see if JVM is installed on your machine and the version of it. If it is not installed, contact your system administration to help you to install it. To download the latest JVM, go to www.java.com.

• Ensure that your PC has a firewall that allows incoming communication to the following ports:
  — UDP Port 69 (TFTP)
  — TCP Port 80 (HTTP)
  — UDP Port 49000

Note: The Avaya Phone VPN Configuration Wizard.jar file creates a log.txt file during execution. This file is helpful to troubleshoot problems you experience using the Avaya Phone VPN Configuration Wizard.jar. The log.txt file is located in the same directory as Avaya Phone VPN Configuration Wizard.jar.

Connecting your IP Deskphone

Before you connect your IP Deskphone to your PC, ensure that components of your phone are connected properly. For more information about connecting your IP Deskphone, see “Connecting the components” on page 29.

Connect your IP Deskphone using one of the following methods:

• connect to your modem. See Figure 8.

• connect to your router. See Figure 9.

• connect to your wireless access point and modem. See Figure 10.
Figure 8: IP Deskphone connected to the modem

Figure 9: IP Deskphone connected to the router
Figure 10: IP Deskphone connected to the wireless access point and modem

Note: If your home network is not configured as described in the above figures, contact your system administrator for assistance.

Note: You cannot connect multiple PCs directly to the PC port on the IP Deskphone.

Note: The Avaya Phone VPN Configuration Wizard requires direct communication with the IP Deskphone on the network. Ensure that your network allows devices to communicate with each other on the local network. Some network equipment allows you to isolate devices from each other. If you are unsure, it is recommended that you temporarily connect your PC to the IP Deskphone to run the initial Avaya Phone VPN Configuration Wizard. See Figure 8.

QoS configuration recommendations

Avaya recommends that you connect the PC to the IP Deskphones PC Ethernet Port as the IP Deskphone provides Quality of Service (QoS) on outbound traffic automatically.

If other PCs share the internet connection then Avaya recommends that you configure QoS for outbound traffic and prioritize the IP Deskphone traffic. Typical QoS methods that are available are port based priority, MAC Address based Priority, and IP Address based Priority. To configure QoS, see your router documentation.
Installing and configuring VPN

Use the following procedure to install and configure VPN on your IP Deskphone.

**Note:** Depending on the version of software installed on your IP Deskphone you may need to upgrade the software on the IP Deskphone prior to configuring the VPN feature.

**To install and configure VPN**

1. Follow the instructions provided by your system administrator to obtain the required files.
2. Power-down the IP Deskphone.
3. Run the Avaya Phone VPN Configuration Wizard.jar file.
   
   The **Welcome & language selection** window of the Wizard appears, as shown in Figure 11.

**Figure 11: Welcome & language selection window**
4. Select your language preference. The following languages are supported:
   - Arabic
   - Chinese - simplified
   - Chinese - traditional
   - Czech
   - Danish
   - Dutch
   - English
   - Finnish
   - French
   - German
   - Greek
   - Hebrew
   - Hungarian
   - Italian
   - Japanese - Katakana
   - Japanese - Kanji
   - Korean
   - Latvian
   - Norwegian
   - Polish
   - Portuguese
   - Russian
   - Spanish
   - Swedish
   - Turkish
5. Click Next.
The **Equipment Setup and VPN** window appears, as shown in Figure 12.

**Figure 12: Equipment Setup and VPN window**

![Avaya Phone VPN Configuration Wizard](image)

6. Verify that the modem, IP Deskphone, and PC are connected properly.

7. Disconnect any VPN connection currently running on your PC. See figure 4 to confirm that your LAN Ethernet Port and PC Ethernet Port on the IP Deskphone are connected correctly.

   **Note:** Connect the IP Deskphone LAN Ethernet port, marked with the % symbol on the back of the phone to your network equipment only. Connect only 1 PC (if applicable) to the PC Ethernet port, marked with the ( symbol on the back of the phone.

   **Note:** Optional: Click **More** to read a description of VPN.

8. Click **Next**.

   The **Locate Data Files** window appears, as shown in Figure 13.
9. Click **Browse** to locate the provisioning files provided by your system administrator if the wizard was not able to locate the files.

10. Click **Next**.

The **Prepare Phone for Configuration** window appears as shown in Figure 14.
11. Power on your IP Deskphone.

   **Note:** Depending on the current software version on the IP Deskphone “Listening Mode” may not be detected. If your phone does not enter “Listening Mode”, follow the steps below.

12. After you hear the chimes tune and the text *Avaya* appears on the IP Deskphone display screen, quickly press the following keys in order.

13. Verify that the IP Deskphone displays *Listening Mode*.

   **Note:** The IP Deskphone can take up to 60 seconds for “Listening Mode” to appear in the display area.

   If the IP Deskphone displays *Listening Mode*, click *Yes* and go to Step 15.
   OR
   If the IP Deskphone does not display *Listening Mode*, click *No.*
The **Prepare Phone for Configuration** (Try again) window appears, as shown in Figure 15.

**Figure 15: Prepare Phone for Configuration (Try again) window**

a. Power off your IP Deskphone and power it back on again..

14. After you hear the chimes tune and the text **Avaya** appears on the IP Deskphone display screen, quickly press the following keys in order..

![Mute buttons](image)

**Note:** The IP Deskphone can take up to 60 seconds for “Listening Mode” to appear in the display area.

b. If the IP Deskphone displays **Listening Mode**, click **Yes** and go to **Step 15**.

OR

If the IP Deskphone does not display **Listening Mode** then your IP Deskphone requires a software upgrade in order to proceed.
Click **No to proceed to a software upgrade**. Follow the next steps to perform a software upgrade on your phone.

The **Prepare Phone for Configuration** window appears as shown in Figure 16.  

**Figure 16: Prepare Phone for Configuration window**

![Prepare Phone for Configuration window](image)

1. Double-press the **Services** key on the IP Deskphone quickly. Select the **Network Configuration** menu item. Move the cursor to locate **Provision:** or **(TFTP IP:)** in the Network Configuration menu, and then write down the existing address of the provisioning server so you can revert to it after you complete this procedure.

   **Note:** If a password prompt dialog box appears, press Cancel. Wait until your IP Deskphone display completes the “Starting DHCP…” screen then perform Step c.

   For information about entering and editing text in the Local menu, see “**Configuring Local Menu options**” on page 78.

2. If you are able to navigate to the **Provision:** or **(TFTP IP:)** parameter, and edit this field, click **Yes**.

   The **Prepare Phone for Configuration (Input Provisioning**
Server IP address) window appears, as shown in Figure 17. OR
If you are not able to navigate and edit the address in Provision: or (TFTP IP:) in the Network Configuration menu or you were not able to edit this field, click No.
The Prepare Phone for Configuration (Alternate Provisioning Server) window appears. See Figure 17.

Figure 17: Prepare Phone for Configuration (Alternate Provisioning Server) window

![Prepare Phone for Configuration (Alternate Provisioning Server) window](image)

**e.** Press the **Auto** soft key on the IP Deskphone.
   Navigate to **12. Provisioning Server**.
   Clear the **Provisioning Server** check box.

**f.** Press the **Config** soft key on the IP Deskphone.
   Navigate to the **Provision:** item.

**Note:** If you can locate the provisioning server address, write it down, and click **Yes**.
Observe the Provision: or (TFTP IP) address, as shown in Figure 18. This is the IP Address of your PC running the Wizard tool. Use the IP Deskphone keypad to enter the Provision: or (TFTP IP) address of the provisioning server.
**Note:** To enter a dot (period) when entering an IP address using the IP Deskphone keypad, press the 1 key repeatedly or you can double-press the asterisk (*) key.

**Figure 18: Prepare Phone for Configuration (Input Provisioning Server IP address) window**

OR

If you cannot locate the **Provisioning Server** address, contact your network administrator to obtain the IP address and follow the administrator instructions. Click **No** to return to the **Prepare Phone for Configuration** window shown in Figure 16.

- g. To reset the IP Deskphone and begin the software update, press the **Apply&Reset** key on the IP Deskphone. The progress bar displays the percent complete of the software transfer.
- h. Restart your IP Deskphone.
- i. Click **Next**.
- j. Go back to **Step Note on page 44** and repeat the steps.
15. When the **Autodiscover Phone** window appears, as shown in figure 19, click **Autodiscover Phone** to discover connected IP Deskphones.

**Note:** Click **Stop** to stop the search.

The text “Searching for connected phones” displays while the connected IP Deskphones are located. The text “Autodiscovery complete” displays in the Avaya Phone VPN Configuration Wizard tool when the search is finished.

If the search is successful, “Listening Mode: Connected” appears in the IP Deskphone display area.

If the search is not successful, do the following

- Ensure that the IP Deskphone continues to display “Listening Mode: Listening…” during the Autodiscovery process. If your IP Deskphone does display this message, power down the IP Deskphone and repeat the steps, starting with Figure 19.

- Ensure that UDP Port 49000 is not currently blocked by your PC firewall.

- Ensure that UDP Port 49000 is not already in use by existing applications on your PC.

- Review the log.txt file for additional information.
16. Click **Next**.

If more than one connected IP Deskphone was discovered, the **Autodiscove Phone (More than one phone was discovered)** window appears. See Figure 20.
Figure 20: Autodiscover Phone (more than one phone was discovered) window

- Obtain the MAC address of the IP Deskphone for which you are configuring the VPN. The MAC address is printed on a label located on the back of the IP Deskphone.
- Select the IP Deskphone to configure from the drop-down list.
- Click Next.

17. When the Configure phone window appears, as shown in Figure 21, click Configure phone to initiate the provisioning session that configures the IP Deskphone.
The progress bar displays the percent complete of the provisioning file transfer. **Configuring phone** is displayed during the file transfer.

18. When **Phone configuration complete** is displayed, click **Next**.

The **Confirmation & Finish** window appears. See Figure 22.
19. Verify that the IP Deskphone is successfully configured.

**Note:** You may be prompted to enter a User ID and Password before the IP Deskphone registers with the system. This information is provided by your system administrator. The following list provides character key mappings.

<table>

a. Look for the following information on the IP Deskphone display:
   — Date
   — Time
   — Type of call server
   — Directory number

b. Lift the IP Deskphone handset and listen for a dial tone.

If the IP Deskphone is not configured successfully, ensure that the basic requirements are met; repeat the steps in the Avaya Phone VPN Configuration Wizard or contact your system administrator. For more information about basic requirements, see “Before you begin” on page 37.
Configuring Telephone Options

Your Avaya 1120E IP Deskphone Services menu lists the following submenus:

- The Telephone Options menu enables you or your system administrator to configure phone preferences. The Telephone Options menu offers the options shown in Figure 23.

- The Password Admin menu enables you or your system administrator to change the Station Control Password (SCPW).

- The Virtual Office Login and Test Local Mode (for Branch Office) menus are listed when an Avaya 1120E IP Deskphone Class of Service is configured for Virtual Office and Branch Office. For more information, see page 155.

Note: The Password Admin, Virtual Office Login, and Test Local Mode menus are not available on all Avaya 1120E IP Deskphones. Consult your system administrator.

</tr>
<tr>
<td>Diagnostics</td>
<td></td>
</tr>
</tbody>
</table>

Note: When an option has a sublist, an ellipsis (…) appears after the option.
Using the Telephone Options menu

Use the Telephone Options menu to access the following:

- “Adjusting the volume” on page 59
- “Adjusting the display screen contrast” on page 60
- “Selecting a language” on page 60
- “Selecting date and time format” on page 61
- “Accessing display diagnostics” on page 62
- “Choosing local dialpad tone” on page 62
- “Viewing telephone information” on page 63
- “Diagnostics” on page 64
- “Configuring call log options” on page 65
- “Choosing a ring type” on page 70
- “Enabling or disabling Call Timer” on page 71
- “Enabling OnHook Default Path” on page 72
- “Changing feature key labels” on page 72
- “Configuring the name display format” on page 74
- “Configuring Live Dialpad” on page 75
- “Configuring Caller ID display order” on page 76
- “Configuring Normal mode indication” on page 77

To use the Telephone Options menu:

1. Press the Services key.

2. Press the Up/Down navigation keys to scroll and highlight Telephone Option.
3. Press the Enter key.

4. Use the Up/Down navigation keys to scroll and highlight an option (for example, Language…).

5. Press the Enter key. The display provides information required to adjust your selection.

6. Choose one of the following:
   — Press the Select soft key to save changes and return to the Telephone Options menu.
   — Press the Cancel soft key to keep existing configurations.
Adjusting the volume
To adjust the volume, press the Services key, select Telephone Options, and select Volume adjustment...

To adjust the volume:

1. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - Ringer
   - Handset listen
   - Handsfree listen
   - Headset listen
   - Buzzer

2. Press the Enter key.

3. To increase or decrease the volume, do one of the following:
   - Press the Down and Up soft keys.
   - Press the Up/Down navigation keys.

4. Choose one of the following:
   - Press the Select soft key to save the volume level and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.
Adjusting the display screen contrast

To adjust the LCD display screen contrast, press the Services key, select Telephone Options, and select Contrast adjustment.

*Note 1:* If you have an Avaya 1100 Series Expansion Module attached to your IP Deskphone, adjusting the telephone’s LCD screen contrast also adjusts the display screen contrast configuration for the Avaya 1100 Series Expansion Module.

*Note 2:* You can also adjust the contrast using the Local Tools menu; Avaya recommends that you use the control in the Telephone Options menu.

To adjust the display screen contrast:

1. To increase or decrease the display contrast level, choose one of the following:
   - Press the Lower and Higher soft keys.
   - Press the Up/Down navigation keys.

2. Choose one of the following:
   - Press the Select soft key to save the contrast level and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.

Selecting a language

The display is available in multiple languages. To choose a language, press the Services key, select Telephone Options, and select Language...
If the Language setting is password-protected, you must enter a password (SCPW) to change the language. If you enter an incorrect password, an error message is displayed. If you enter an incorrect password more than three times, the password functionality is locked. Contact your system administrator to unlock the password.

*Note:* This language setting controls the language used by features on your phone only. To set the language used elsewhere on your phone, press **Services** twice, select Preferences, and select **Language**.

### To select a language:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired language (for example, German [Deutsche]).

   *Note:* Some languages may not be installed on your IP Deskphone. Contact your system administrator for more information about available languages.

2. Choose one of the following:
   - Press the **Select** soft key to save the language and return to the **Telephone Options** menu.
   - Press the **Cancel** soft key to keep existing configurations.

### Selecting date and time format

Several date and time formats are available. Formats are based on the 12-hour and 24-hour clocks. To select the date and time format, press the **Services** key, select **Telephone Options**, and select **Date/Time**...
To select a date and time format:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired format. Sample formats appear on the upper-right side of the display area.

2. Choose one of the following:
   - Press the **Select** soft key to save the format and return to the **Telephone Options** menu.
   - Press the **Cancel** soft key to keep existing configurations.

---

**Accessing display diagnostics**

The Display diagnostics option tests the IP Deskphone display screen and indicator lights. To access display diagnostics, press the **Services** key, select **Telephone Options**, and select **Display diagnostics**.

To select Display diagnostics:

1. Press the **Up/Down** navigation keys to scroll through the list to view display capabilities.

   2. Press the **Cancel** soft key to return to the **Telephone Options** menu.

---

**Choosing local dialpad tone**

The Local DialPad Tone option produces Dual-Tone Multi-Frequency (DTMF) sounds, a single tone, or no sound when you press a key on the
dialpad. To choose a local dialpad tone, press the Services key, select Telephone Options, and select Local DialPad Tone.

To choose a local dialpad tone:

1. Press the Up/Down navigation keys to highlight one of the following dialpad tones:
   - None to disable all tones
   - Short Click to enable a single tone for all keys
   - DTMF to turn on a separate DTMF tone for each key

2. Choose one of the following:
   - Press the Select soft key to save the tone selection and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.

Viewing telephone information

The Set Info option displays the following phone-specific information:

- General Info
- Set IP Info
- Ethernet Info
- Server Info
- Encryption Info

To view IP Deskphone information, press the Services key, select Telephone Options, and select Set Info.
Configuring Telephone Options

To view IP Deskphone information:

1. Press the **Up/Down** navigation keys to scroll through the list to view the IP Deskphone information.

2. Press the **Cancel** soft key to return to the **Telephone Options** menu.

Diagnostics

The Diagnostics option displays the following phone-specific information:

- **Diag Tools** (Ping, do Route Traces)
- **EtherStats** (Speed, Auto Neg, CRC Errors, Collision)
- **IP Stats** (Packet Info)
- **RUDP Stats** (Msg receive/trans)
- **QOS Stats**

To view diagnostic information, press the **Services** key, select **Telephone Options**, and select **Diagnostics**.

To view IP Deskphone information:

1. Press the **Up/Down** navigation keys to scroll through the list of diagnostic information.

2. Press the **Cancel** soft key to return to the **Telephone Options** menu.
Configuring call log options

Use the call log option to configure the following preferences:

- “Configuring the Callers List log” on page 65
- “Configuring New Call Indication” on page 66
- “Configuring Preferred Name Match” on page 67
- “Configuring Area Code Setup” on page 68

Configuring the Callers List log

You can configure the Callers List to log all incoming calls including calls while your IP Deskphone is busy, or only unanswered calls. The default setting is Log all calls. To log only unanswered calls, press the Services soft key, select Telephone Options, and select Call Log Option from the menu.

To log only unanswered calls:

1. Press the Up/Down navigation keys to scroll and highlight the Log Mode option.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight Log unanswered calls.

4. Choose one of the following:
   - Press the Select soft key to save the configuration.
   - Press the Cancel soft key to keep existing configurations.
To log all incoming calls including calls while your IP Deskphone is busy, press the **Services** key and select **Call Log Option** from the Telephone Options menu.

**To log all incoming calls including calls while IP Deskphone is busy:**
1. Press the Up/Down navigation keys to scroll and highlight the **Incoming Calls** option.
2. Press the **Select** soft key.
3. Press the Up/Down navigation keys to scroll and highlight **Log calls if busy**.
4. Choose one of the following:
   — Press the **Select** soft key to save the configuration.
   — Press the **Cancel** soft key to keep existing configurations.

**Configuring New Call Indication**
You can configure your Avaya 1120E IP Deskphone to display a message to indicate that a new incoming call was received. The default configuration is On. To configure new call indication, press the **Services** key, select **Telephone Options**, and select **Call Log Option**.

**To configure New Call Indication:**

1. Press the **Up/Down** navigation keys to scroll and highlight the **Log Mode** option.
2. Press the **Enter** key.
3. Press the **Up/Down** navigation keys to scroll and highlight **New Call Indication**.
Configuring Telephone Options

4. Press the Enter key.

5. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - New call indication off
   - New call indication on

6. Choose one of the following:
   - Press the Select soft key to save the configuration.
   - Press the Cancel soft key to keep existing configurations.

Configuring Preferred Name Match
You can configure your Avaya 1120E IP Deskphone to display the name of the caller as defined in your Personal Directory. The default configuration is Off. To configure Preferred Name Match, press the Services key, select Telephone Options, and select Call Log Option.

To configure Preferred Name Match:

1. Press the Up/Down navigation keys to scroll and highlight Preferred Name Match.

2. Press the Enter key.
Configuring Area Code Setup

Use the Area Code Setup menu to save up to three area codes. When an incoming call arrives with an area code that matches one of the three stored area codes, the incoming call number is reordered to display the phone number followed by the area code (as opposed to the area code followed by the phone number).

This reordering is also performed when you scroll through your Callers List. To configure area codes, press the Services key, select Telephone Options, and select Call Log Option.

To configure default area codes (maximum of three):

1. Press the Up/Down navigation keys to scroll and highlight Area Code Setup.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - Preferred name match on
   - Preferred name match off

4. Choose one of the following:
   - Press the Select soft key to save the configuration.
   - Press the Cancel soft key to keep existing configurations.
To edit area code display:

1. Press the Up/Down navigation keys to scroll and highlight Area Code Setup.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - Area Code # 1
   - Area Code # 2
   - Area Code # 3

4. Press the Enter key.

5. Use the dialpad to enter the number at the prompt.

6. Choose one of the following:
   - Press the Select soft key to save the configuration.
   - Press the Cancel soft key to keep the existing configurations.
Choosing a ring type

The Ring type… option configures the phone’s ring tone. To choose a ring type, press the Services key, select Telephone Options, and select Ring type…

To choose a ring type:

1. Press the Up/Down navigation keys to scroll and highlight one of the ring types.

3. Press the **Up/Down** navigation keys to scroll and highlight one of the following:
   - Area Code # 1
   - Area Code # 2
   - Area Code # 3

4. Press the **Enter** key.

5. Use the dialpad to edit the number.

6. Choose one of the following:
   - Press the **Select** soft key to save the configuration.
   - Press the **Cancel** soft key to keep existing configurations.
Enabling or disabling Call Timer

The call timer measures how long you are on each call. To enable Call Timer, press the Services key, select Telephone Options, and select Call Timer.

To enable or disable Call Timer:

1. Choose one of the following:
   — To turn on the call timer, press the On soft key.
   — To turn off the call timer, press the Off soft key.

2. Press the Play soft key to sample the ring tone.

3. Choose one of the following:
   — Press the Select soft key to save the ring type and return to the Telephone Options menu.
   — Press the Stop soft key and use the Up/Down navigation keys to select a different ring type.
   — Press the Cancel soft key to keep existing configurations.
Enabling OnHook Default Path

The OnHook Default Path option allows control whether a headset or the Handsfree feature is used to operate your IP Deskphone while it is on-hook. To enable OnHook Default Path, press the Services key, select Telephone Options, and select OnHook Default Path.

To enable OnHook Default Path:

1. Press the Up/Down navigation keys to highlight one of the following:
   — Handsfree enable
   — Headset enable

2. Choose one of the following:

   — Press the Select soft key to save the default path and return to the Telephone Options menu.
   — Press the Cancel soft key to keep existing configurations.

Changing feature key labels

The Change feature key label option renames the label displayed next to each feature key or restores the default labels to the keys. To rename feature key labels, press the Services key, select Telephone Options, and select Change feature key labels.
If the feature key label setting is password-protected, you must enter a password (SCPW) to change the feature key label. If you enter an incorrect password, an error message is displayed. If you enter an incorrect password more than three times, the password functionality is locked. Contact your system administrator to unlock the password.

**Note:** If a feature key is configured as an auto-dial key, the label does not change if the auto-dial key configuration changes.

**To rename the labels:**

1. Press the **Enter** key.
2. Home key
3. Press the feature key that you are changing.
   
   **Note:** If you enter a prime DN key, an error message appears.

4. Enter the new information for the feature key label. To enter special characters, press the **Up** navigation key. For information about entering text, refer to “Entering text using the dialpad” on page 26.

5. Choose one of the following:
   
   — Press the **Select** soft key to save the changes and return to the **Telephone Options** menu.
   
   — Press the **Cancel** soft key to keep existing configurations.

**To restore the default labels:**
Configuring Telephone Options

To restore default labels, press the Services key, select Telephone Options, and select Change feature key labels.

7. Press the Enter key.

8. Use the Up/Down navigation keys to scroll and highlight one of the following:
   a. Restore all key labels
      — Press the Yes soft key to change all feature keys to default values.
   b. Restore one key label
      — Press the Select soft key.
      — Press the feature soft key.
      — Press the Yes soft key to change the selected feature key label to the default value.

   Note: When labels are changed to default values, you cannot undo the change. The labels must be reentered.

Configuring the name display format

You can configure your Avaya 1120E IP Deskphone to display the name of the incoming calling party in the following formats:

- first name, last name
- last name, first name

To configure name display format, press the Services key, select Telephone Options, and select Name Display Format.
To configure name display format:

1. Press the Up/Down navigation keys to scroll and highlight **Name display format**.
2. Press the **Enter** key.
3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   - **first name, last name**
   - **last name, first name**
4. Choose one of the following:
   - Press the **Select** soft key to save the configuration.
   - Press the **Cancel** soft key to keep existing configurations.

**Configuring Live Dialpad**

The Live Dialpad option activates the Primary DN key when you make a call by dialing a directory number on the dialpad without picking up the handset or pressing the handsfree key.

To configure Live Dialpad, press the **Services** key, select **Telephone Options**, and select Live Dialpad.
To configure Live Dialpad:

1. Press the Up/Down navigation keys to scroll and highlight Live Dialpad.

2. Press the Enter key.

3. Press the Up/Down navigation keys to scroll and highlight one of the following:
   — On
   — Off (default)

4. Choose one of the following:
   — Press the Select soft key to save the configuration.
   — Press the Cancel soft key to keep existing configurations.

**Configuring Caller ID display order**

Caller ID display order appears in 2 formats:

- Number, name (default)
- Name, Number

Use the following procedure to configure Caller ID display order.

1. Press the Services key, select Telephone Options and select Caller ID display order.

2. Press the Up/Down navigation keys to scroll and select one of the following:
   — Number, name (default)
— Name, number

3. Press the **Select** soft key to save the configuration, else press the **Cancel** key to cancel the modifications.

**Configuring Normal mode indication**

The **Normal** mode display indication can be On or Off when the IP Deskphone is in normal mode.

Use the following procedure to configure Normal mode indication.

1. Press the **Services** key, select **Telephone Options**, and select **Normal mode** indication.

2. Press the **Up/Down** navigation keys to scroll and select one of the following:
   — **On**
   — **Off**

3. Press the **Select** soft key to save the configuration, else press the **Cancel** key to cancel the modifications.
Configuring Local Menu options

Note 1: Many of the options discussed in this section are for administrator use only. Do not make any changes unless instructed by an administrator.

Note 2: Your system administrator can establish a password for the Local Tools menu. When the password is enabled, a password prompt dialog box appears when you attempt to access this menu. If this happens, contact your system administrator.

Your Avaya 1120E IP Deskphone has both local and server-based options. Press the Services key twice to access the Local Tools menu, which is organized into the following submenus:

- “1. Preferences submenu” on page 80
- “2. Local Diagnostics submenu” on page 86
- “3. Network Configuration menu” on page 88
- “4. Lock Menu” on page 89

If a menu entry has a number in front of it, you can select that entry by pressing the associated key on the dialpad. For example, when you are in the Local Tools menu, you can access 2. Local Diagnostics by pressing the 2 key on the dialpad.

The function of some keys on the IP Deskphone varies depending on the situation. The key functions in the menus are described in Table 5.

**Table 5: Navigation key functions in menus (Part 1 of 2)**

<table>

Note: If you are using a USB mouse, you can right-click on the Telephony screen to open the Local Tools menu, and click on an item to select it.

1. Preferences submenu

The Local Tools menu 1. Preferences submenu offers the following choices:

- “Changing 1. Display Settings” on page 80
- “Changing 2. Language” on page 82
- “Changing 3. Headsets” on page 83

Changing 1. Display Settings

The Display Settings menu provides access to two tools: Contrast and Sleep. Use the Contrast tool to alter the physical settings of the display. Use the Sleep tool to control how long the display remains lit if the phone is inactive.

Note: Contrast can also be adjusted in the Telephone Options menu; Avaya recommends that you use the control in the Telephone Options menu whenever possible.

To configure the Contrast or Sleep tools, press the Services key twice to open the Local tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 1 key on the dialpad to select 1. Display Settings.
To configure Contrast or Sleep tools:

1. Press the **Up/Down** arrow keys to scroll and highlight one of the following:
   - **Contrast**
   - **Sleep**

   **Note**: Sleep is displayed in the format *xxx*, where *xxx* is a time in minutes or hours.

2. Press the **Enter** key.

3. Press the **Up/Down** arrow keys to increase or decrease the selected value.

   **Note 1**: Available values for Sleep are as follows:
   - 5m (5 minutes)
   - 15m (15 minutes)
   - 30m (30 minutes)
   - 1h (1 hour — default)
   - 2h (2 hours)
   - Never (screen does not go black)

   **Note 2**: Extending the sleep time or never sleeping reduces the life span of the display screen.

4. Press the **Exit** soft key to exit to the main display. Changes are saved automatically.
Changing 2. Language

Use the Language menu item to configure local preferences. Use the Language tool to select the language used on your phone.

*Note:* This language setting controls the language used in the local menus on your phone only. To select the language used by features on your phone, press the Services key, select Telephone Options, and select Language…

To select the language used in the local menus, press the Services key twice to open the Local tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 2 key on the dialpad to select 2. Language.

To select the language used in local menus:

1. Press the Up/Down navigation keys to scroll and highlight the desired language (for example, German [Deutsche]).

2. Choose one of the following:
   - Press the Select soft key to save the desired language and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.

3. Press the Exit soft key to exit to the main display. Changes are saved automatically.
Changing 3. Headsets

Headset Configuration

Each headset has its own tuning parameters, and your deskphone must be configured to use the proper parameters. If you do not configure the deskphone for the proper tuning parameters, you may not be taking full advantage of the audio qualities of the headset.

Selecting Active Headset Device

To select the Active Headset Device, press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 3 key on the dialpad to select 3. Headsets.

To select the active headset device

1. Press the Up/Down navigation keys to scroll and highlight the Headsets menu.

2. Highlight the Wired Headset Type field.

3. Press the Up/Down navigation keys to scroll and highlight the headset type (Headset Type 1, Headset Type 2, or Headset Type 3).

   Note: To determine the headset type that is compatible with your headset, see the product bulletin.

Enabling HID Commands

To enable HID Commands, press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 3 key on the dialpad to select 3. Headsets.
To enable HID Commands:

1. Press the Up/Down navigation keys to scroll and highlight the Headsets menu.

2. Select the Enable HID Commands checkbox.

3. Choose one of the following:
   - Press the Select soft key to save the desired selection and return to the Telephone Options menu.
   - Press the Cancel soft key to keep existing configurations.

4. Press the Exit soft key to exit to the main display. Changes are saved automatically.

Avaya Mobile Headset Adapter properties

You can use the Avaya Mobile Headset Adapter to answer calls whenever the Avaya 1120E IP Deskphone is running.

To access the Avaya Mobile Headset Adapter (MHA) properties, press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 3 key on the dialpad to select 3. Headsets.

Note: The Headset type and Backlight options are only available when MHA is attached.
Table 8 describes the features of the Avaya Mobile Headset Adapter.

### Table 8: Avaya Mobile Headset Adaptor elements and functions

2. Local Diagnostics submenu

Use the Local Tools menu 2. Local Diagnostics submenu to access the following:

- “1. IP Set Information” on page 86
- “2. Network Diagnostic Tools” on page 86
- “3. Ethernet Statistics” on page 86
- “4. IP Network Statistics” on page 87
- “5. USB Devices” on page 87
- “6. Advanced Diag Tools” on page 87
- “7. License Information” on page 87
- “8. VPN Information” on page 87
- “9. Certificate Information” on page 88
- “10. DHCP Information” on page 88

Note: Press the Return soft key to return to the Local Diagnostics submenu at any time while working tools in the Local Diagnostics submenu. Use the Return key to quickly gather information and run tests without exiting and reentering the Local Tools menu. For example, you can check the Ethernet Statistics, then press Return and enter the Network Diagnostics Tools to ping an IP address.

1. IP Set Information

The Network Configuration tool is used to view reports about IP set operation. This tool is for administrator use only.

2. Network Diagnostic Tools

The Network Diagnostic Tools menu contains tools that are used to diagnose network problems. This menu is for administrator use only.

3. Ethernet Statistics

The Ethernet Statistics tool is used to view reports about Ethernet operation. This tool is for administrator use only.
4. **IP Network Statistics**

The IP Networks Statistics tool is used to view reports about network operation. This tool is for administrator use only.

5. **USB Devices**

The USB devices tool provides information about Universal Serial Bus (USB) devices that connect to your phone. Your Avaya 1120E IP Deskphone automatically detects USB devices when you connect them to the USB port in the back of the phone.

To check USB device information, press the Services key twice to open the Local tools menu, press the 2 key on the dialpad to select **2. Local Diagnostics**, and press the 5 key on the dialpad to select **5. USB Devices**.

To check USB device information:

The screen displays information about connected devices.

1. Press the Return soft key to return to the main display.

6. **Advanced Diag Tools**

The Advanced Diag Tools are available to the Avaya support organization to configure the auto recovery function and remote access.

7. **License Information**

The system administrator can use the License Information menu to view license information.

8. **VPN Information**

The system administrator can use the VPN Information menu to view VPN information.
9. Certificate Information
The system administrator can use the Certificate Information menu to view certificate information.

10. DHCP Information
The system administrator can use the DHCP Information menu to view license information.

3. Network Configuration menu
The Network Configuration tool displays information that was configured when the IP Deskphone was installed. This tool is for system administrator use only.

You may need to access this menu to configure specific IP address information to meet the requirements of your network.

To configure an IP Deskphone for a static IP address:
1. Press the Services key twice.
2. Enter the Admin password.
3. Select Network Configuration.
4. Scroll down to DHCP and ensure it is unchecked.
5. Enter the IP address in the Set IP field.
6. Enter the Net Mask in the Net Mask field.
7. Enter the Gateway in the Gateway field.
8. Enter DNS IPs (if applicable).

To obtain an IP Address via DHCP:
1. Press the Services key twice.
2. Enter the Admin password.
3. Select Network Configuration.
4. Scroll down to DHCP and ensure it is checked.
5. Press **Apply**. The phone reboots.

**4. Lock Menu**

Your system administrator can use the lock menu tool to protect the Local Tools menu items from accidental or unwanted changes. This tool is for administrator use only.
Making a call

This section describes features associated with making a call. You can make a call from your Avaya 1120E IP Deskphone using any of the following methods:

- “Using Off-hook dialing” on page 91
- “Using On-hook dialing” on page 91
- “Using handsfree dialing” on page 92
- “Using the Directory applications” on page 94
- “Using Predial” on page 98
- “Using AutoDial” on page 99
- “Using Ring Again” on page 101
- “Using Last Number Redial” on page 102
- “Using Speed Call” on page 103
- “Using System Speed Call” on page 104
- “Using HotLine” on page 104
- “Using intercom calling” on page 105
Using Off-hook dialing

1. Lift the handset.

2. Dial the number.

3. To terminate the call, choose one of the following:
   - Replace the handset into the cradle.
   - Press the Goodbye key.

Using On-hook dialing

1. Leave the handset in the cradle.

2. Press the line (DN) key.

3. When the dial tone sounds, dial the number.

4. When the called party answers, lift the handset.
Using handsfree dialing

Use handsfree dialing to use a built-in microphone and speaker, or a headset, instead of the handset. While on an active call, you can switch between Handset and Handsfree mode.

To use handsfree dialing:

1. Press the **Handsfree** key.

2. If a headset is connected, press the **Headset** key.

3. Dial the number.

To discontinue a handsfree call:

Press the **Goodbye** key.
To mute a handsfree call:

1. Press the **Mute** key. The LED indicator flashes.

2. Press the **Mute** key again to return to a two-way handsfree conversation.

To switch from handsfree to handset:

Lift the handset.

To switch from handset to handsfree:

1. Press the **Handsfree** key.

2. Replace the handset.

To use a headset:

1. Connect the **headset** to the headset jack or the handset jack.

2. Press the **Headset** key.
To switch from handsfree to headset:

1. Press the **Headset** key.

(Headset)

**Using the Directory applications**

You can make calls using the following Directory applications available on your Avaya 1120E IP Deskphone:

- “Making a call using Corporate Directory” on page 94
- “Making a call using the Personal Directory” on page 95
- “Making a call using the Callers List” on page 96
- “Making a call using the Redial List” on page 97

**Making a call using Corporate Directory**

*Note:* This feature is not available on all phones. Contact your system administrator to find out if this feature is available for your use.

The Corporate Directory feature provides an alphabetical list of entries using last names. You can search by name, view additional information on each entry, and dial Corporate Directory numbers. To use the Corporate Directory, press the **Directory** key and select **Corporate Directory**.

To search for a specific number:

1. When prompted, use the dialpad to enter the desired name in the last name, first name format.
Making a call

To scroll to a specific number:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Corporate Directory.

2. Choose one of the following:
   — Press the Dial soft key to dial the resulting number.
   — Press the Cancel soft key to exit without dialing.

Making a call using the Personal Directory

The Personal Directory feature allows you to store a maximum of 100 entries consisting of names and numbers. To use the Personal Directory, press the Directory key and select Personal Directory. For information
Making a call

on how to configure and use the Personal Directory, refer to “Using the Personal Directory” on page 148.

To make a call using the Personal Directory:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Personal Directory.

2. Choose one of the following:
   — Press the Dial soft key to dial the resulting number.
   — Press the Cancel soft key to exit without dialing.

Making a call using the Callers List

The Callers List feature automatically stores up to a maximum of 100 callers. After 100 callers have been stored, each additional caller overwrites the oldest entry. To use the Callers List, press the Directory key and select Callers List. For information on how to configure and use the Callers List, refer to “Using the Callers List” on page 151.

To make a call using the Callers List:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Callers List.
Making a call

Making a call using the Redial List

The Redial List feature automatically stores a maximum of 20 previously dialed phone numbers. To use the Redial List, press the Directory and select Redial List. For information on how to configure and use the Redial List, refer to “Using the Redial List” on page 153.

To make a call using Redial List:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Redial List.

   Note: Press the right arrow key if no name is stored against the number.

2. Choose one of the following:

   — Press the Dial soft key to dial the resulting number.
   — Press the Cancel soft key to exit without dialing.

Viewing the date and time of a call

In both the Redial List and Caller List, you can check the date and time of a call.
Making a call

To view date and time of a call:

1. Press the Up/Down navigation keys to scroll and highlight a name in the Redial List or Caller List.

2. Press the Right navigation key to display the DN of the selected entry.

3. Choose one of the following:
   — In the Redial List, press the Down navigation key to display the date and time the last call was placed to the selected entry.
   — In the Caller List, press the Down navigation key twice to display the date and time of the last call from the selected entry.

   Note: In the Caller List, the first press of the Down navigation key displays the number of times a caller has called.

Using Predial

Use the Predial feature to enter, preview, and edit numbers before dialing.

To use Predial:

1. Without selecting the line key, enter the number to be dialed.
To edit a Predial number:

1. Use the dialpad to enter the number.

2. Choose one of the following:
   - To erase all numbers, press the Clear soft key. Reenter the numbers to be dialed.
   - To change one number at a time, press the Delete soft key to backspace. Re-enter the number.

3. Press a line key to dial the number.

Using AutoDial

Use the AutoDial feature to display, store, and automatically dial phone numbers.
Making a call

To store an AutoDial number:

1. Without lifting the handset, press the appropriate AutoDial key.
   
   **Note:** The display screen displays the word Autodial next to the appropriate key.

2. Using the dialpad, dial the phone number (including access code) to be stored on the selected AutoDial key.

3. Press the AutoDial key a second time to store the number on the selected key.
   
   **Note:** After you store a number, the word Autodial disappears, and the stored number is displayed.

4. Assign a label to the key.
   
   **Note:** After you assign the label, the number disappears and only the label appears on the screen next to the key.

To display an AutoDial number:

1. Press the Display key.

2. Press an AutoDial key in the upper display area to display the number associated with that key.
To use AutoDial:

1. Lift the handset.

2. Press an AutoDial key in the upper display area to dial the number associated with that key.

Using Ring Again

Use the Ring Again feature if you receive a busy tone or if there is no answer. Your IP Deskphone rings when the person you called becomes available. Ring Again automatically redials the number.

To activate Ring Again:

1. Dial a number and receive a busy tone or no answer.

2. Choose one of the following:
   — Press the Ring Again soft key.
   — Enter the Ring Again Activate FFC.

To call a Ring Again party when you receive notification:

1. After receiving the notification ring, lift the handset, or, if you are using the headset or in Handsfree mode, go to step 2.
To deactivate Ring Again before notification:

Choose one of the following:

— Press the **Ring Again** soft key a second time.

— Enter the **Ring Again Deactivate** FFC.

**Using Last Number Redial**

Use the Last Number Redial feature to automatically redial the last dialed number.

**To use Last Number Redial:**

Choose one of the following:

1. To redial using the handset:
   — Lift the handset.
   — Press the line (DN) key.

2. To redial without lifting the handset, press the line (DN) key twice (the last number dialed is automatically redialed).
Using Speed Call

Use the Speed Call feature to place internal and external calls by dialing a one-, two-, or three-digit code to store, edit, and automatically dial frequently called phone numbers.

To store a Speed Call number:

1. Press the Speed Call Controller soft key. The triangular icon flashes, indicating programming mode.

2. At the prompt:
   - Enter a one-, two-, or three-digit code (0-999).
   - If required, dial the access code.
   - Enter the phone number (internal, external or long-distance number).

3. Press the Speed Call Controller soft key again to save the code and number. The flashing icon turns off.

To make a Speed Call:

1. Lift the handset.

2. Press the Speed Call Controller soft key.
Using System Speed Call

Use the System Speed Call feature to dial Speed Call codes that override dialing restrictions placed on your IP Deskphone.

To make a System Speed Call:

1. Lift the handset.

2. Choose one of the following:

   - Press the System Speed Call soft key.
   - Press the System Speed Call Controller (SScCtl) key.

3. Dial the Speed Call code to automatically dial the number.

Using HotLine

Use the HotLine feature to automatically dial a specific number.

To use HotLine:

Press the HotLine soft key to automatically dial the number.
Using intercom calling

Use the Intercom feature to call a member of your intercom group by pressing the code assigned to each member.

To make an intercom call:

1. Lift the handset.

2. Press the **Intercom** key.

3. Dial the one- or two-digit code for the desired intercom group member.

To answer an intercom call while on a line other than your intercom group line:

1. Choose one of the following keys:
   - Press the **Hold** key to put the current call on hold.
   - Press the **Goodbye** key to end the call.

2. Press the **Intercom** key and begin to speak.
Answering a call

Each incoming call causes the phone to ring, the LCD indicator (علامة) beside the Line (DN) key to flash, and the Message Indicator lamp to flash.

To answer a call:

Choose one of the following four options:

- Lift the handset.
- Press the Handsfree button located on the left side of the handset.
- Press the line (DN) key beside the LCD indicator as it flashes.
- Press the Headset key if a headset is connected to your IP Deskphone.
While on an active call

This section describes the following features, available during an active call:

- "Placing a call on hold" on page 107
- "Transferring a call" on page 108
- "Using Timed Reminder Recall" on page 109
- "Using Attendant Recall" on page 110
- "Using Call Park" on page 111
- "Recording a Calling Party Number" on page 113
- "Displaying incoming call information" on page 113
- "Tracing a malicious call" on page 114

Placing a call on hold

Use the Hold feature when you are talking on one line and another call arrives on a second line. Retain the original call by putting it on hold and then answer the second call.

To place a call on hold:

Press the Hold key. The LCD indicator flashes beside the line on hold.

Note: If Automatic Hold is enabled, the active call is automatically put on hold when you answer the second call.

To retrieve a call on hold:

Press the line (DN) key beside the flashing LCD indicator.
While on an active call

Transferring a call

Use the Transfer feature to redirect a call to the appropriate person.

To transfer a call to a third party:

1. Press the **Transfer** soft key. The other party is put on hold and a dial tone sounds. The LCD indicator light flashes steadily.

2. Dial the DN to which you are transferring the call or use the **Personal Directory**, **Redial List**, or **Callers List** to select a number to dial.

3. When that number rings or a person answers, press the **Transfer** soft key to connect the calling party.

To return to the original call, if the transfer is incomplete:

If the person called is not available, press the 2493 line (DN) key (next to the LCD indicator) to reconnect to the original call.
Using Timed Reminder Recall

Use the Timed Reminder Recall feature to receive a reminder tone when a transferred call is not answered.

To use Timed Reminder Recall:

1. Press the **Transfer** soft key. The call is put on hold.

2. Dial the number to which you are transferring the call.

3. Choose one of the following to start the recall timer:
   - Press the **Transfer** soft key.
   - Replace the handset before the extension answers.

_**Note:** If the transfer is complete, the recall timer stops._
If the transferred call is not answered, your IP Deskphone rings:

1. Lift the handset to reconnect to the original caller.

2. Choose one of the following:
   - Press the **Transfer** soft key and repeat the transfer.
   - If the transfer is picked up while you are on the line, press the **Goodbye** key to complete the transfer.

---

**Using Attendant Recall**

Use the Attendant Recall feature to contact an attendant during a call and to connect the caller to the attendant.

**To contact the attendant while on a call:**

1. Press the **Attendant Recall** key and stay on the line until the attendant answers.

2. Press the **Goodbye** key. The caller remains connected to the attendant.
Using Call Park

Use the Call Park feature to hold temporarily (park) and retrieve a call from any IP Deskphone. Using Call Park does not tie up a line. When configured network-wide, Call Park can be used across networks. A System Park extension can be configured to automatically park most calls.

To park a call on the System Park DN or your own DN:

During an active call, press the Park soft key twice.

*Note:* By default, the call is parked on your DN unless a System Park DN is enabled to automatically park calls on the system.

To park a call on a DN other than the System Park DN or your own DN:

1. Press the Park soft key.
2. Dial the DN where you want to park the call.
3. Press the Park soft key.
While on an active call

To park a call using the SPRE code or FFC:

1. Choose one of the following:
   — Press the **Transfer** soft key.
   — Press the **Conference** soft key.

2. Dial the **Call Park** FFC.

3. To use an alternate DN from the **System Park** DN or your own DN, dial the DN where you want to park the call. Otherwise, proceed to step 4.

4. Choose one of the following:
   — Press the **Transfer** soft key.
   — Press the **Conference** soft key.

To retrieve a parked call:

1. Lift the handset.

2. Press the **Park** soft key.

3. Dial the DN where you parked the call.

**Note:** If a parked call is not retrieved within a specified period of time, it rings back to your IP Deskphone or to the attendant.
Recording a Calling Party Number

Use the Calling Party Number feature to record a caller’s number, or to charge a call to an account number, during an established call.

To record a caller’s number for accounting purposes:

1. Press the Call Party soft key. The caller is placed on hold.

2. Dial a charge account number or the caller’s number.

   Note: For information on using the Charge key, see “Charging a call or charging a forced call” on page 138.

3. Press the Call Party soft key to return to the call.

Displaying incoming call information

Use the Display feature to display a second incoming caller’s number and name (if available) during an active call, without interfering with the call in progress.

To view the information on an incoming call while on a call in progress:

1. Press the Display key.
While on an active call

2493 📞 📞 2. Press the flashing line (DN) key. The call waiting information displays.

**Note:** When used with other feature keys, the *Display* key displays information associated with those feature keys.

**Tracing a malicious call**

Use the Call Trace feature to trace nuisance calls within your system.

**Note:** This is not a default feature. Contact your system administrator to configure this feature on your IP Deskphone.

To use Call Trace while on a call:

```
CallTrace ➕ ➕ Press the **Call Trace** key.
```

To use Call Trace without a Call Trace key:

```
1. Choose one of the following:
   — Press the **Transfer** soft key.
   — Press the **Conference** soft key.

2. Dial the **SPRE code** followed by 83 or dial the **Call Trace** FFC to automatically reconnect.
```
Incoming calls

You can use the following features when you have an incoming call:

- “Using Automatic Answerback” on page 115
- “Using Call Pickup” on page 115
- “Using Call Waiting” on page 117

Using Automatic Answerback

When the Automatic Answerback feature is active, your IP Deskphone automatically answers in Handsfree mode after one ring; however, calls are not forwarded to the voice message service.

To activate Automatic Answerback:

AutoAns  
Press the Automatic Answerback key.

To deactivate Automatic Answerback:

AutoAns  
Press the Automatic Answerback key again.

Using Call Pickup

Use the Call Pickup feature to pick up calls from any IP Deskphone in your pickup group or another pickup group.

To answer a call in your own call pickup group:

1. Lift the handset.
Incoming calls

2. Choose one of the following:
   - Press the **Pickup** key.
   - Enter the **Pickup Ringing Number** FFC.

To answer an incoming call in another call pickup group:

1. Lift the handset.
2. Press the **Group Pickup** key or enter the **Pickup Group** FFC.
3. Dial the pickup group number of the ringing IP Deskphone.

To answer a call at a specific extension in any pickup group:

1. Lift the handset.
2. Choose one of the following:
   - Press the **Pickup** key.
   - Enter the **Pickup Directory Number** FFC.
Using Call Waiting

The Call Waiting feature alerts you to an incoming call by producing a tone. It also puts the current call on hold while you answer the new call.

To answer an incoming call while on another call:

1. When the incoming call tone sounds, press the **Hold** key to put the current call on hold.

   *Note:* If **Automatic Hold** is enabled, it is not necessary to press the **Hold** key.

2. Press the **Call Waiting** key.

To return to the first IP Deskphone call:

1. Choose one of the following:
   - Press the **Hold** key to put the second call on hold.
   - Press the **Goodbye** key to end the second call.
**Incoming calls**

2493 📞 🔄 2. Press the line (DN) key associated with the first call.

If you do not have a Call Waiting key:

1. Press the *Goodbye* key to end the current call.

(Goodbye)

2493 📞 🔄 2. Press the line (DN) key beside the flashing status icon to answer the incoming call.
While away from your desk

You can use the following features when you are away from your desk:

- “Using Call Forward” on page 119
- “Using Internal Call Forward” on page 121
- “Using Remote Call Forward” on page 122
- “Securing your IP Deskphone” on page 124

Using Call Forward

Use the Call Forward feature to direct incoming calls to ring on another line (DN). If the IP Deskphone is ringing, the call cannot be forwarded.

To forward your calls or change the forward number:

1. Choose one of the following:
   - Press the Forward soft key.
   - Lift the handset and enter the Call Forward All Calls Activate FFC.

2. Dial the DN where you want to forward your calls.

3. Press the Forward soft key.

To see the number to which calls are being forwarded, press the Forward soft key. A message box with the target number is displayed, as seen in Figure 24 on page 120.
While away from your desk

Figure 24: Call Forward display

Press **OK** to return to the idle screen or press **Cancel** to cancel Call Forwarding.

To deactivate Call Forward:

Choose one of the following:

- Press the **Forward** soft key and press the **Cancel** soft key.

  OR

- Lift the handset and enter the **Call Forward All Calls Deactivate** FFC.
To reinstate Call Forward to the same number:

Press the **Forward** soft key twice.

---

### Using Internal Call Forward

Use Internal Call Forward to accept only calls originating at internal DNs to ring at another DN. Calls originating outside your IP Deskphone system still ring at your IP Deskphone. Current incoming calls cannot be forwarded.

**To forward internal calls:**

1. Choose one of the following:
   - Press the **Internal Call Forward** key.
   - Lift the handset and enter the **Internal Call Forward Activate** FFC.

2. Dial the DN to which you are forwarding your internal calls.

3. Press the **Internal Call Forward** key.
While away from your desk

To deactivate Internal Call Forward:

Choose one of the following:

1. Lift the handset and enter the **Internal Call Forward Deactivate** FFC.
2. Press the **Internal Call Forward** key and press the **Cancel** soft key.

**or**

To reinstate Call Forward to the same number:

Press the **Internal Call Forward** key twice.

Using Remote Call Forward

Use the Remote Call Forward feature (from any phone other than your own) to forward calls to any IP Deskphone.

To activate Remote Call Forward:

1. Lift the handset.
2. If you are calling from an IP Deskphone outside the system, dial your direct system access number and wait for the dial tone.
3. Dial the **Remote Call Forward Activate** FFC to activate the feature.
While away from your desk

4. Dial your **Station Control Password**. A dial tone sounds.

5. Choose one of the following:
   - Dial your DN.
   - To forward calls to the previous call forward phone number, press the # key. (Do not perform steps 6 and 7.)

6. Dial the number to which you are forwarding calls. If calls are forwarded to an invalid number, a fast busy signal sounds.

7. Press the # key.

**To deactivate Remote Call Forward:**

1. Lift the handset.

2. If you are calling from an IP Deskphone outside the system, dial the **direct system access** number and wait for the dial tone.

3. Dial the **Remote Call Forward Deactivate** FFC.
4. Dial your **Station Control Password**.

5. After you hear the dial tone, dial your DN.

6. Press the # key.

**Securing your IP Deskphone**

Use the Electronic Lock feature to prevent others from making calls from your IP Deskphone. The Electronic Lock feature is controlled using your Station Control Password (SCPW). To change your Station Control Password, please refer to “Security features” on page 23.

**To lock your IP Deskphone:**

1. Lift the handset.

2. Dial the **Electronic Lock Activate** FFC.

3. Dial your **Station Control Password**.
While away from your desk

To unlock your IP Deskphone:

1. Lift the handset.

2. Dial the **Electronic Lock Deactivate** FFC.

3. Dial your **Station Control Password**.

4. Choose one of the following:
   - If you are dialing locally, press the **Goodbye** key.
   - If you are dialing the FFC remotely, dial your DN.
Talking with more than one person

Use the following features to enable conversations between more than two people:

- “Using the Call Join feature” on page 126
- “Setting up a conference call” on page 127
- “Using Conferee Selectable Display” on page 128
- “Using Group Call” on page 129

Using the Call Join feature

Use the Call Join feature to connect a call to a current active call. This connection creates a conference between the two callers and yourself.

To connect a call on hold (on a different line) to your current call:

1. Press the Conference soft key.
2. Press the line key that has the number of the caller you want to connect to your current call.
3. Press the Conference soft key to join the person on hold to your conversation.
Setting up a conference call

Use the Conference feature to set up a conference call for a maximum of three or six people including yourself. The maximum number of people the conference feature supports depends on the configuration of your IP Deskphone.

To set up a conference call:

1. While on a call, press the Conference soft key to place the party on hold. You hear a dial tone.

2. Dial the number of the person you want to add to the conference call. You can talk privately to the person you are adding at this time.

   Note: If you press the Directory key, you can also use the Corporate Directory, Personal Directory, Redial List, and Callers List to find and dial the number of the person you want to add to the conference call.

3. Press the Conference soft key a second time to conference all parties together.

If the person you attempt to add to the conference is unavailable:

1. Press the Goodbye key.
Using Conferee Selectable Display

Use the Conferee Selectable Display and Disconnect feature to list active conferees and disconnect a conferee from the conference call.

To view active conferees:

1. While on a conference call, press the Conferee Selectable Display key to turn on the LCD indicator. Each key press changes the screen to show a different active conferee.

   *Note:* This action has no effect on the display of other IP Deskphones involved in the conference.

2. Press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.

To disconnect a conferee:

1. While on a conference call, press the Conferee Selectable Display key until the conferee you want to disconnect appears on the screen.
Talking with more than one person

2493  

2. Press the line (DN) key on which the conference call is established.

3. Choose one of the following:
   — For a single conferee, press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.
   — For multiple conferees, repeat steps 1 and 2 until all conferees are disconnected. Then press the Goodbye key.

Using Group Call

Use the Group Call feature to automatically call members of a predefined group, one at a time, until all members answer.

To call group members:

1. Lift the handset.
1. Lift the handset. Note the following about notification tones:

- If you are on a call and receive three 10-second tones, this is the notification of a group call on your current extension.

- If you are on a call on another line when a group call is made, you receive a long tone through the handset or speaker.

- If you are already on a conference call or another group call, you do not receive notification of a group call.

2. Press the Group Call key or enter the Group Call FFC.

- The feature automatically calls all group members. The icon flashes until all members answer.

- The phone numbers of the group members appear on the display as they answer. When the last person answers, the Group Call indicator lights steadily.

- When a person in your group is on a conference call or another group call, they are not connected to your group call.

- After everyone in the group has answered, only the person who made the group call can put the call on hold.

To answer a group call:
To end a group call:

Press the **Goodbye** key.

*Note:* When the person who made the group call disconnects, the call terminates for all members of the group. However, the members of the group call can disconnect from the call and not affect other members on the call.
Working without interruption

This section describes the Activating Make Set Busy feature, which provides uninterrupted work time.

Activating Make Set Busy

Use the Make Set Busy feature to make your IP Deskphone appear busy to all callers.

To activate Make Set Busy:

Choose one of the following:

— Press the Make Set Busy key.
— Lift the handset and enter the Make Set Busy Activate FFC.

To deactivate Make Set Busy:

Choose one of the following:

— Press the Make Set Busy key a second time to deactivate the feature.
— Lift the handset and enter the Make Set Busy Deactivate FFC.

Call Deflect

If Call Deflect is configured on your IP Deskphone, you can press the Deflect feature key to deflect your call if your IP Deskphone rings and you do not want to answer the call. The call may be forwarded to your voice mail or to another telephone number, depending on your system.
configuration. Contact your system administrator to learn which treatment is configured for your IP Deskphone.

**Figure 25: Call Deflect Key**

If you press the **Deflect** key and no special call treatment has been configured, your caller receives a busy signal.

**Using Record On Demand key**

If your call recording server does not support wideband call recording, you cannot use the call recording feature. For more information, contact your system administrator.

If this feature is enabled, you can use the Record on Demand (ROD) feature key to record your telephone conversation.

Press the **ROD** key to start or stop the call recording. This key is associated with the active user ID and is displayed only if a call is active. The **ROD** key blinks while it is connecting to the call recording application, and is lit when the call is recording.

The **ROD** key is displayed in the following scenarios:

- Normal operation - Press the **ROD** key during an active call to record the call.
- Call Recording (CR) application in ROD Mode - Press the **ROD** key during an active call to record the call.
• Bulk Recording - For an active call or unregistered DN/Position ID, call recording is initiated even though the ROD key is not pressed.

1. Press the ROD key during an active call.

2. To stop the call recording, press the ROD key again.

**Using SAVE key**

Use the SAVE feature key to save the recording of an active call. This key is associated with the active user ID and is operational only if a call is active.

The SAVE key is displayed in the following scenarios:

• Normal operations - If the SAVE key is pressed during an active call, the call is saved.

• CR application in Bulk Record + Save everything mode - Recorded conversation is saved at the end of the call. If the SAVE key is pressed, then the call is not saved.

• CR application in Bulk Record + Delete everything mode - Recorded conversation is deleted at the end of the call. If the SAVE key is pressed, then the call is saved.

The SAVE key lamp status depends on the status of the call recording. If the call is to be saved, then the lamp is lit.

1. Press the ROD key during an active call.

2. To stop the call recording, press the ROD key again.
Additional call features

Contact your system administrator to determine if the following call features are available on your IP Deskphone.

- “Using AutoDial Transfer” on page 135
- “Using the Buzz feature” on page 136
- “Using Call Page Connect to make an announcement” on page 136
- “Using Centrex/Exchange Line Switchhook Flash” on page 137
- “Charging a call or charging a forced call” on page 138
- “Using Enhanced Override” on page 141
- “Using Forced Camp-on” on page 142
- “Overriding a busy signal” on page 143
- “Using Privacy Release” on page 143
- “Using Radio Page” on page 144
- “Using Voice Call” on page 146

Using AutoDial Transfer

Use the AutoDial Transfer feature to transmit digits through your AutoDial key to the Central Office after a Trunk Switchhook Flash. You must be on a Central Office/Exchange (CO) trunk call from or to a CO that offers Centrex or exchange line-type features.

To use AutoDial Transfer when picking up an incoming trunk call:

1. Press the Centrex Switchhook Line Flash key and wait for an interrupted dial tone.
Using the Buzz feature

Use the Buzz feature to notify another person of a call, a visitor, or a request. Two IP Deskphones that are linked together enable one person to signal the other. The person signaled hears a buzz.

To buzz the IP Deskphone linked to your IP Deskphone:

1. Lift the handset.
2. Press the **AutoDial** key to call the number desired.
3. Press the **Goodbye** key to end the call.

Press the **Buzz** key. The IP Deskphone linked to your IP Deskphone buzzes as long as you press the key.

Using Call Page Connect to make an announcement

Use the Call Page Connect feature to make an announcement over a paging system.

*Note:* A **Page** key on an attendant console overrides and disconnects the IP Deskphones. The IP Deskphones must reaccess the page trunk.

To connect to Call Page:

1. Lift the handset.
Using Centrex/Exchange Line Switchhook Flash

Use the Centrex/Exchange Line Switchhook Flash feature during an established call to use a Centrex service, such as Call Transfer or Three-Way Calling.

To use Centrex/Exchange Line Switchhook Flash:

1. While on a call, press the Centrex Line Switchhook Flash key. A special dial tone sounds.

2. Dial the codes for your custom Centrex feature.

3. Press the Goodbye key to end the call.
Charging a call or charging a forced call

Use the Call Charge feature to charge a call to a specific account. The Forced Charge feature charges long-distance calls from an IP Deskphone restricted to local calls.

To charge a local or long-distance call to an account before you dial:

1. Lift the handset.

2. Choose one of the following:
   — Press the Charge soft key.
   — Dial the Call Detail Recording FFC.

3. Dial the charge account number.

4. When the dial tone sounds, dial the number.

To charge a call in progress:

1. Choose one of the following:
   — Press the Transfer soft key.
   — Press the Conference soft key.
To charge a call to an account when you transfer a call:

1. Press the Transfer soft key. The call is on hold.

2. Choose one of the following:
   — Press the Charge soft key.
   — Dial the Call Detail Recording FFC.

3. Dial the charge account number.

4. After the dial tone, dial the number to which you are transferring the call.
To charge a call to an account when you add someone to a conference call:

1. Press the **Conference** soft key. The call is placed on hold.

2. Choose one of the following:
   - Press the **Charge** soft key.
   - Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Dial the number of the person you want to add to the conference.

5. Press the **Conference** soft key.
Using Enhanced Override

Use the Enhanced Override feature to override an active call after you attempt a Forced Camp-on. Use Enhanced Override to make a call or a consultation call, such as placing a call on hold and calling another party.

To use Enhanced Override:

1. Choose one of the following:
   - Press the **Override** key.
   - Enter the **Override** FFC to initiate a Forced Camp-on.

   If either person on the call disconnects at this time, you receive an overflow (fast busy or engaged) signal.

2. Choose one of the following:
   - Press the **Override** key again.
   - Enter the **Override** FFC again.

   The other two people on the call receive an override tone and a conference call is established between the three of you. If anyone disconnects, the other two people remain connected.

3. To terminate the call, press the **Goodbye** key.
Using Forced Camp-on

Use the Forced Camp-on feature to automatically ring another IP Deskphone (internal or external) immediately after that IP Deskphone disconnects from its current call.

To use Forced Camp-on:

You receive a busy signal after dialing a phone number.

1. Choose one of the following:
   — Press the Override key.
   — Enter the Override FFC, to initiate a Forced Camp-on.

   Note: The person you called receives a tone, and you receive a ring signal or a busy signal, depending on the options chosen. You are now camped-on to the number you dialed.

2. Return the handset to the cradle.

3. When the person you called finishes the call, your IP Deskphone automatically dials the number and both IP Deskphones ring.

Answering a call camped-on to your extension:

When your IP Deskphone rings, lift the handset.

Note: You can program your IP Deskphone for either Camp-on or Call Waiting, but not both.
Overriding a busy signal

Use the Override feature to override a busy signal and interrupt another call.

To override a busy signal:

1. You receive a busy signal after dialing a phone number.

2. Choose one of the following:
   - Press the **Override** key.
   - Enter the **Override** FFC. The people in the targeted call receive a tone for approximately 1 second. After Override joins you to their call, a short tone repeats every 16 seconds.

3. To terminate the call, press the **Goodbye** key.

Using Privacy Release

Use the Privacy Release feature to enable one or more people who share your DN to join a call.
To use Privacy Release in an established state:

Press the **Privacy Release** soft key during a call. People can join the call by pressing the shared number (DN) key on their IP Deskphone (Multiple Appearance DN feature).

**Using Radio Page**

Use the Radio Page feature to page a person and stay on the line until they answer. The paged person answers the call after entering a special Page Meet-me code from any IP Deskphone.

**To use Automatic Preselection (Meet-me page):**

1. Lift the handset.

2. Dial the **Radio Paging Access** FFC. The paging tone sounds (two beeps followed by a dial tone).

3. Dial the number of the party you want to page. After dialing, the ringback tone sounds.

**Note:** The paged person can use any IP Deskphone to enter a **Radio Paging Answer** FFC, plus their own DN number.
To use Automatic Post-selection:
The called party is either busy on the IP Deskphone or away from their desk. To page the called party, you do not need to redial the number of the called party.

2. Dial the Radio Paging Access FFC. The ringback tone sounds.
   
   **Note**: The paged person can use any IP Deskphone to enter a Radio Paging Answer FFC, plus their own DN number.

3. If your call goes unanswered for a preset time period and a 15-second high-pitched tone sounds, followed by silence, press the Goodbye key or replace the handset.

   **Goodbye**

   **or**

To answer a Radio Page:
Additional call features

If you carry a Radio Pager, a page indicates that someone dialed your DN. If the Radio Page system is configured to function in Meet-me mode, you can answer the page call from any IP Deskphone.

1. Lift the handset.

2. Dial the **Radio Paging Answer** FFC. The paging tone sounds.

3. Dial your own DN to connect to the paging caller. If the caller has disconnected, a steady high-pitched (number unavailable) tone sounds.

Using Voice Call

Use the Voice Call feature to make an announcement through someone else's IP Deskphone speaker.

To make a voice call:

1. Lift the handset.

2. Press the **Voice Call** key and make the announcement.

3. Press the **Goodbye** key.
To respond to a voice call:

Your IP Deskphone rings once and the caller's voice transmits through your speaker. Lift the handset.
The following features are described in this section:

- “Using the Personal Directory” on page 148
- “Using the Callers List” on page 151
- “Using the Redial List” on page 153
- “Using Virtual Office” on page 155
- “Using Media Gateway 1000B” on page 164

**Using the Personal Directory**

Use the Personal Directory feature to create and store up to 100 directory entries. A Personal Directory entry can contain:

- last name (up to 24 characters)
- first name (up to 24 characters)
- phone numbers (up to 31 characters)

To use the Personal Directory, press the Directory key and select Personal Directory.

*Note:* If password control has been enabled, enter your SCPW at the prompt.

To add an entry:

1. Press the **Add** soft key.

   *Note:* If the message *Directory is full* appears, delete one or more entries to add a new entry.
2. Use the dialpad to enter the name.

3. Press the **Next** soft key.

4. Use the dialpad to enter the phone number.

5. Choose one of the following:
   - Press the **Done** soft key to save the new entry.
   - Press the **Cancel** soft key to discard the new entry and return to the Add screen.

---

**To edit an entry:**

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Edit** soft key and perform your edits.
To delete an entry:

1. Press the Up/Down navigation keys to scroll and highlight the entry.
2. Press the Delete soft key.
3. Choose one of the following:
   — Press the Confirm soft key to delete the entry.
   — Press the Cancel soft key to return to the Personal Directory without deleting the entry.

To search for an entry:

1. Press the Up/Down navigation keys to scroll and highlight the desired entry.
Using the Callers List

The Callers List feature logs all incoming calls. The Callers List can store up to 100 entries. When the list is full, the system overwrites the oldest entry. Use the Callers List feature to review missed calls and to dial calls. The Callers List contains:

- the caller’s last and first name (if available)
- the DN of the caller
- the time and date of the call
- the number of times the caller called

*Note*: If the caller name is not defined, then only the telephone number is displayed.

Entries in the Callers List are sorted by the time the call arrived.

*Note*: Calling Party Name Display (CPND) is affected depending on the Preferred Name Match option. If Preferred Name Match is on, the CPND appears according to your configurations. If the Preferred Name Match option is off, the CPND appears according to the system configurations.

To access the Callers List, press the Directory key and select Callers List.

*Note*: If password control is enabled, enter your SCPW at the prompt.
To dial an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Dial** soft key.

To delete an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Delete** soft key.

3. Choose one of the following:
   - Press the **Confirm** soft key.
   - Press the **Cancel** soft key.

To delete the entire Callers List:

1. Press the **Delete** soft key.
Using the Redial List

The Redial List feature logs all outgoing calls. The Redial List can store up to 20 entries. When the list is full, the system overwrites the oldest entry. Use the Redial List feature to review calls made and to redial previously dialed calls. The Redial List contains:

- the last and first name of the dialed party (if available)
- the DN of the dialed party
- the time and date of the last dialed occurrence

**Note:** If the caller name is not defined, then only the telephone number is displayed.

Entries in the Redial List are sorted by the time the call arrived.

**Note:** Calling Party Name Display (CPND) is affected depending on the Preferred Name Match option. If Preferred Name Match is on, the CPND appears according to your configurations. If the Preferred Name Match option is off, the CPND appears according to the system configurations.

To access Redial List, press the **Directory** key and select **Redial List**.

**Note:** If password control is enabled, enter your SCPW at the prompt.

To dial an entry:

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Choose one of the following soft keys:
   - **Yes** to delete the entire Callers List
   - **No** to return to the previous screen
Additional phone features

2. Press the **Dial** soft key.

**To delete an entry:**

1. Press the **Up/Down** navigation keys to scroll and highlight the desired entry.

2. Press the **Delete** soft key.

3. Choose one of the following soft keys:
   - **Yes** to delete the entry
   - **No** to return to the previous screen

**To delete the entire Redial List:**

1. Press the **Delete** soft key.

2. Choose one of the following soft keys:
   - **Yes** to delete the entire Callers List
   - **No** to return to the previous screen
Using Virtual Office

The Virtual Office feature provides a service you can use while you are away from your desk to transfer calls, and all your office IP Deskphone features, to a remote IP Deskphone. Virtual Office makes this possible by allowing you to use another IP Deskphone (the Remote phone) to log in to your own home or office IP Deskphone (the Office phone). After you log in, you can access the DNs, autodial numbers, key layout, feature keys, and voicemail features that are configured on your own home or office IP Deskphone.

To use Virtual Office, you need your DN and preconfigured Station Control Password (SCPW). You must activate Virtual Office on your Office phone before you can connect to it from a Remote phone. See “Logging in to Virtual Office” on page 156.

Note: Consult your system administrator to verify if the Virtual Office feature is available for your use.

You can use an IP Deskphone as a Remote phone to connect to your Avaya 1120E IP Deskphone even if it is a different IP Deskphone model. Table 9 shows the IP Deskphones on which you can use Virtual Office to connect to your Avaya 1120E IP Deskphone.

Table 9: Virtual Office connection availability

<table>
<thead>
<tr>

Table 9: Virtual Office connection availability

<table>
<thead>
<tr>
<th>IP Deskphone model</th>
<th>Possible to log in to the 1120E?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Avaya 2007 IP Deskphone</td>
<td>Yes</td>
</tr>
<tr>
<td>Avaya 2033 IP Conference Phone</td>
<td>Yes, with restrictions</td>
</tr>
<tr>
<td>Avaya 2050 IP Softphone</td>
<td>Yes, with restrictions</td>
</tr>
</tbody>
</table>

**Note 1:** When logged into an Avaya 1120E IP Deskphone or an Avaya 2050 IP Softphone using Virtual Office, feature keys 4 and 5, and the Shift key, are not available to the Avaya 1120E IP Deskphone.

**Note 2:** A Virtual Office login to an Avaya 1120E IP Deskphone from an Avaya 1110 IP Deskphone, IP Phone 2001, Avaya 2033 IP Conference Phone, or Avaya 2050 IP Softphone is blocked in certain situations. Consult your system administrator.

Logging in to Virtual Office

If the IP Deskphone is configured for Virtual Office, the Virtual soft key is displayed, as shown in Figure 26: “Virtual soft key” on page 156.

**Figure 26: Virtual soft key**

To activate Virtual Office from this IP Deskphone on your Office IP Deskphone:
1. Press the Virtual soft key.

2. At the prompt, enter your user ID.

3. Press the Enter key.

4. At the prompt, enter the home Station Control Password (SCPW).

   **Note 1:** If the user ID is not found locally, the message “Locating Remote Server” is displayed.

   **Note 2:** After three failed login attempts, wait 1 hour before attempting to log in again, or contact your system administrator to reset your password. For more information, see “Security features” on page 23.

   **Note 3:** Your Virtual Office session expires after a fixed period of time, (determined by your system administrator).

A successful login transfers all the features, time, date, and tones to your Remote IP Deskphone from your Office IP Deskphone.
Using Virtual Office on your Remote IP Deskphone

Because the display characteristics, including size, vary from one IP Deskphone model to the next, your Office Avaya 1120E IP Deskphone display is different on each Remote phone. Figure 27 shows an Avaya 1120E IP Deskphone logged in as a Remote phone to an Avaya 1120E IP Deskphone Office phone. All the features appear as they do on your Office Avaya 1120E IP Deskphone.

**Figure 27: Logged in to an Avaya 1120E IP Deskphone**

![Figure 27: Logged in to an Avaya 1120E IP Deskphone](image)

Figure 28 shows an Avaya 1140E IP Deskphone logged in as a Remote phone to an Avaya 1120E IP Deskphone Office phone. Fewer display lines are available on the Avaya 1120E IP Deskphone, so the display provides less information.
Figure 28: Logged in to an Avaya 1120E IP Deskphone using an Avaya 1140E IP Deskphone

Figure 29 shows an IP Softphone 2050 logged in as a Remote phone to an Avaya 1120E IP Deskphone Office phone. In this case, the information display is arranged in a different fashion, but all the information is visible at one time.

Figure 29: Logged in to an Avaya 1120E IP Deskphone using an Avaya 2050 IP Softphone
Using Virtual Office on your Office IP Deskphone

Figure 30 shows the Avaya 1120E IP Deskphone display when the phone is logged out due to remote access.

Figure 30: Office phone displays the message *Logged Out*

When activated for Virtual Office by a Remote IP Deskphone, your Office IP Deskphone is *logged out* and no longer operational. If this is the case when you return to your office, you can disconnect the remote login and regain control of your Office phone. If you do not disconnect the remote login, your Virtual Office session expires after a fixed period of time, determined by your system administrator.
To regain operation of an IP Deskphone being used for Virtual Office:

Choose one of the following:

— To completely disconnect your Office IP Deskphone from the Remote IP Deskphone:
  a. Press the **Home** key.
  b. Enter your User ID and password (this logs the Office IP Deskphone back on to your office network).

— Press the **Virtual** soft key to log in to another IP Deskphone, and your IP Deskphone becomes a Remote IP Deskphone.

Logging out of Virtual Office

To log out of Virtual Office, press the Virtual soft key.

Automatic log out from Virtual Office

Your remote Virtual Office IP Deskphone may be configured to automatically log out of Virtual Office after a predetermined period of inactivity. When automatic logout is about to occur, the following message is displayed on the IP Deskphone: "Logout phone now?"

Press **Yes** to allow the IP Deskphone to log out of Virtual Office or press **No** to remain logged in to Virtual Office and reset the IDLE timer. If no key is pressed, the IP Deskphone logs out of Virtual Office.

Emergency calls on your Remote IP Deskphone

If you make an emergency call while logged in to Virtual Office on a Remote IP Deskphone, the call is placed to the local emergency service, not to your home office emergency service.
Note: Some IP Deskphones are configured as Virtual Office-only telephones and have no assigned DN. However, these IP Deskphones can still be used to make emergency calls. “Emergency Calls only “ is displayed on the IP Deskphone display when not logged in to Virtual Office. When the phone goes off-hook, dial tone is available for emergency calls only. All other calls are restricted.

**Troubleshooting Virtual Office**

Virtual Office can display error messages on-screen. Table 10 lists error messages and describes actions to correct the causes.

**Table 10: Troubleshooting Virtual Office (Part 1 of 3)**

<table>
<thead>
<tr>
<th>Displayed Message</th>
<th>Probable Cause</th>

</tr>
</tbody>
</table>
Using Media Gateway 1000B

The Media Gateway 1000B (MG 1000B) provides a means of extending Avaya Communication Server 1000 Release 4.5 features to one or more remotely located branch offices using the Branch Office feature. A branch office is a remote location in the network where IP Deskphones, PSTN access, and TDM IP Deskphones are located. Contact your system administrator to see if these functions are available for your use.

The Media Gateway 1000B (MG 1000B) IP Deskphone can operate in Normal or Local Mode.

Normal Mode

The IP Deskphone registers with the Main Office and receives IP Deskphone services from the Main Office. At any time during Normal Mode, you can check Local Mode functionality (make and receive calls) by enabling Local Mode and returning to Normal Mode. After testing, you

<table>
<thead>
<tr>
<th>Displayed Message</th>
<th>Probable Cause</th>

<td>Remote IP Deskphone does not have VOUA Class of Service.</td>
<td>Notify system administrator.</td>
</tr>
</tbody>
</table>
can return to Normal Mode (see “Using Resume Normal Mode” on page 165) or by waiting for 10 minutes.

**Local Mode**

If the WAN connection fails, the IP Deskphone loses communication with the Main Office Telephone Preference Service (TPS). It then registers with the MG 1000B and receives IP Deskphone services from the MG 1000B. Features such as Personal Directory, Redial List, and Callers List are not available when operating in Local Mode. When in Local Mode, the IP Deskphone displays the message *LOCAL MODE*.

**Using Test Local Mode**

Use Test Local Mode to check Local Mode functionality (make and receive IP Deskphone calls). Test Local Mode is useful when provisioning has changed for an IP Deskphone on an MG 1000B Controller.

1. Press the **Services** key.

2. Press the **Up/Down** navigation keys to scroll and highlight **Test Local Mode**.

3. Press the **Enter** key (the IP Deskphone resets and registers back to the Main Office).

**Using Resume Normal Mode**

Use the Resume Normal Mode command to return to Normal Mode after testing survival functionality.
**Note:** If you do not use the Resume Normal Mode command after testing, the IP Deskphone automatically returns to Normal Mode in 10 minutes.

1. Press the **Services** key.

2. Press the **Up/Down** navigation key to scroll and highlight **Resume Normal Mode**.

3. Press the **Enter** key (the IP Deskphone registers back to the main office).

---

**Troubleshooting MG 1000B**

The MG 1000B can display error messages on-screen. Table 11 lists error messages and describes actions to correct the causes.

---

Using Hospitality features

Hospitality features are intended for hotel operations. The following features are discussed in this section:

- “Configuring Automatic Wake-Up” on page 168
- “Activating Message Registration” on page 170
- “Using Maid Identification” on page 172
- “Displaying Room Status” on page 173

Configuring Automatic Wake-Up

Use the Automatic Wake-Up feature to receive a timed reminder call. From your IP Deskphone, you can program the system to automatically place a call to you at a predetermined time. When you answer the call, recorded music plays for up to 30 seconds, followed by a prerecorded announcement or the attendant.

To enter the time for an Automatic Wake-Up call:

1. Lift the handset.

2. Dial the Automatic Wake-Up Request FFC.

3. Dial the Automatic Wake-Up time in a 24-hour time format (hhmm). A tone sounds to confirm your entered time.

   Note: In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is entered as 2145.
To cancel an Automatic Wake-Up call:

1. Lift the handset.

2. Dial the **Automatic Wake-Up Quit** FFC.

3. Press the **Goodbye** key.

To verify the time for the Automatic Wake-Up call:

1. Lift the handset.

2. Dial the **Automatic Wake-Up Verify** FFC.

3. Dial the **Automatic Wake-Up** time in a 24-hour time format (hhmm). If your query matches the preset time, a confirmation tone sounds.

   **Note:** In a 24-hour time format, 7:30 a.m. is entered as 0730; 9:45 p.m. is 2145.
Using Hospitality features

Activating Message Registration

Use the Message Registration feature to read, change, or reset meters that log your hotel IP Deskphone calls.

To read meters:

1. Press the **Message Registration** key.
2. Dial the room **Directory Number** (DN).
3. Press the **Message Registration** key.

To change a meter:

1. Press the **Message Registration** key.
2. Dial the **Directory Number** (DN).
3. Dial the correct meter count.
To reset a meter to zero:

1. Press the **Message Registration** key.
2. Dial the room DN.
3. Press the * key.
4. Press the **Message Registration** key.
5. Press the **Message Registration** key.
Using Hospitality features

Using Maid Identification

Use the Maid Identification feature to track the cleaning status of rooms. The maid enters the information from the IP Deskphone in each room.

To enter cleaning status:

1. Press the **Room Status** key.

2. Dial the DN for the room.

3. Dial one of the following cleaning status codes:
   - 1 = Cleaning requested
   - 2 = Cleaning in progress
   - 3 = Room cleaned
   - 4 = Room passed inspection
   - 5 = Room failed inspection
   - 6 = Cleaning skipped
   The interrupted dial tone sounds.

4. Press the * key.

5. Dial the **Maid ID**. If you dial the wrong **Maid ID**, press the * key and redial the ID.

6. Press the **Room Status** key.
Displaying Room Status

Use the Room Status feature to display the status of a room using the Display Module.

To read the status of a room:

1. Press the **Room Status** key.

2. Dial the DN for the room. The DN is displayed followed by a two-digit code. The first digit indicates the occupancy status:
   - **0** = Room vacant
   - **1** = Room occupied

   The second digit indicates the cleaning status of the room:
   - **1** = Cleaning requested
   - **2** = Cleaning in progress
   - **3** = Room cleaned
   - **4** = Room passed inspection
   - **5** = Room failed inspection
   - **6** = Cleaning skipped

3. Press the **Room Status** key.

Changing the status of a room:

1. Press the **Room Status** key.
2. Dial the DN for the room. The DN displays followed by a two-digit code. The first digit indicates the occupancy status:

0 = Room vacant
1 = Room occupied

The second digit indicates the cleaning status of the room:

1 = Cleaning requested
2 = Cleaning in progress
3 = Room cleaned
4 = Room passed inspection
5 = Room failed inspection
6 = Cleaning skipped

3. Dial the status code for the room. A three-digit code appears. The first digit indicates the occupancy status, the second is the previous cleaning status, and the third is the new status.

4. Press the **Room Status** key.
Accessing External Server Applications

Use External Server Applications to access a variety of applications directly from your Avaya 1120E IP Deskphone.

To find out what features and services are available, contact your system administrator. Depending on what is available on your system, your phone can provide information; for example, local news and weather, stock market information, or traffic reports.

For more information about the External Server Applications, consult the Avaya IP Phone External Server Applications User Guide.
Use Table 12 to keep track of the FFCs assigned by your system administrator.

Regulatory and safety information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Note: The user should not make changes or modifications not expressly approved by Avaya. Any such changes could void the user’s authority to operate the equipment.

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Warnings:

• This is a Class B product. In a domestic environment this product can cause radio interference in which case the user must take adequate measures.
• Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Warning

Please be careful of the following while installing the equipment:

- Please only use the Connecting cables, power cord, AC adaptors shipped with the equipment or specified by Avaya to be used with the equipment. If you use any other equipment, it may cause "failures, malfunctioning or fire".
- Power cords shipped with this equipment must not be used with any other equipment. In case the above guidelines are not followed, it may lead to death or severe injury.

警告

本製品を安全にご使用頂くため、以下のご注意ください。

- 接続ケーブル、電源コード、ACアダプタなどの部品は、必ず製品に同梱されております添付品または指定品をご使用ください。添付品・指定品以外の部品をご使用になると故障や動作不良、火災の原因となることがあります。
- 同梱されております付属の電源コードを他の機器には使用しないでください。 上記注意事項を守らないと、死亡や大怪我など人身事故の原因となることがあります。
Third party terms

Third Party Terms for UNIStim sw releases 4.1 thru 5.0 (Jan 2010 - Nov 2010)

Certain portions of the product ("Open Source Components") are licensed under open source license agreements that require Avaya to make the source code for such Open Source Components available in source code format to its licensees, or that require Avaya to disclose the license terms for such Open Source Components. For a period of three years from your date of purchase of a product containing any of the software listed below from Avaya Inc., any Avaya affiliate or an authorized Avaya reseller, we will provide upon request a complete machine readable copy of the source code for such Open Source Component on a medium customarily used for software interchange for a charge no more than our cost of physically performing source distribution. To get access to the source code, you may contact Avaya at (408) 577-7666.

The Open Source Components are provided "AS IS". ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR THE CONTRIBUTORS OF THE OPEN SOURCE COMPONENTS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THE PRODUCT, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

END OF TERMS AND CONDITIONS

GNU

The following component is licensed under the GNU General Public V2 license:

GNU General Public V2 License

GNU GENERAL PUBLIC LICENSE Version 2, June 1991 Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place - Suite 330, Boston, MA 02111-1307, USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed. Preamble The licenses for most software are designed to take
away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation’s software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things. To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it. For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights. We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software. Also, for each author’s protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors’ reputations. Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone’s free use or not licensed at all. The precise terms and conditions for copying, distribution and modification follow. TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION 0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into
another language. (Hereinafter, translation is included without limitation in
the term "modification".) Each licensee is addressed as "you". Activities
other than copying, distribution and modification are not covered by this
License; they are outside its scope. The act of running the Program is not
restricted, and the output from the Program is covered only if its contents
constitute a work based on the Program (independent of having been
made by running the Program). Whether that is true depends on what the
Program does. 1. You may copy and distribute verbatim copies of the
Program's source code as you receive it, in any medium, provided that
you conspicuously and appropriately publish on each copy an appropriate
copyright notice and disclaimer of warranty; keep intact all the notices that
refer to this License and to the absence of any warranty; and give any
other recipients of the Program a copy of this License along with the
Program. You may charge a fee for the physical act of transferring a copy,
and you may at your option offer warranty protection in exchange for a
fee. 2. You may modify your copy or copies of the Program or any portion
of it, thus forming a work based on the Program, and copy and distribute
such modifications or work under the terms of Section 1 above, provided
that you also meet all of these conditions: * a) You must cause the
modified files to carry prominent notices stating that you changed the files
and the date of any change. * b) You must cause any work that you
distribute or publish, that in whole or in part contains or is derived from the
Program or any part thereof, to be licensed as a whole at no charge to all
third parties under the terms of this License. * c) If the modified program
normally reads commands interactively when run, you must cause it,
when started running for such interactive use in the most ordinary way, to
print or display an announcement including an appropriate copyright
notice and a notice that there is no warranty (or else, saying that you
provide a warranty) and that users may redistribute the program under
these conditions, and telling the user how to view a copy of this License.
(Exception: if the Program itself is interactive but does not normally print
such an announcement, your work based on the Program is not required
to print an announcement.) These requirements apply to the modified
work as a whole. If identifiable sections of that work are not derived from
the Program, and can be reasonably considered independent and
separate works in themselves, then this License, and its terms, do not
apply to those sections when you distribute them as separate works. But
when you distribute the same sections as part of a whole which is a work
based on the Program, the distribution of the whole must be on the terms
of this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote it.
Thus, it is not the intent of this section to claim rights or contest your rights
to work written entirely by you; rather, the intent is to exercise the right to
correct the distribution of derivative or collective works based on the
Program. In addition, mere aggregation of another work not based on the
Program with the Program (or with a work based on the Program) on a
volume of a storage or distribution medium does not bring the other work
under the scope of this License. 3. You may copy and distribute the
Program (or a work based on it, under Section 2) in object code or
executable form under the terms of Sections 1 and 2 above provided that
you also do one of the following: * a) Accompany it with the complete
 corresponding machine-readable source code, which must be distributed
under the terms of Sections 1 and 2 above on a medium customarily used
for software interchange; or, * b) Accompany it with a written offer, valid
for at least three years, to give any third party, for a charge no more than
your cost of physically performing source distribution, a complete
machine-readable copy of the corresponding source code, to be
distributed under the terms of Sections 1 and 2 above on a medium
customarily used for software interchange; or, * c) Accompany it with the
information you received as to the offer to distribute corresponding source
code. (This alternative is allowed only for noncommercial distribution and
only if you received the program in object code or executable form with
such an offer, in accord with Subsection b above.) The source code for a
work means the preferred form of the work for making modifications to it.
For an executable work, complete source code means all the source code
for all modules it contains, plus any associated interface definition files,
plus the scripts used to control compilation and installation of the
executable. However, as a special exception, the source code distributed
need not include anything that is normally distributed (in either source or
binary form) with the major components (compiler, kernel, and so on) of
the operating system on which the executable runs, unless that
component itself accompanies the executable. If distribution of
executable or object code is made by offering access to copy from a
designated place, then offering equivalent access to copy the source
code from the same place counts as distribution of the source code, even
though third parties are not compelled to copy the source along with the
object code. 4. You may not copy, modify, sublicense, or distribute the
Program except as expressly provided under this License. Any attempt
otherwise to copy, modify, sublicense or distribute the Program is void,
and will automatically terminate your rights under this License. However,
parties who have received copies, or rights, from you under this License
will not have their licenses terminated so long as such parties remain in
full compliance. 5. You are not required to accept this License, since you
have not signed it. However, nothing else grants you permission to modify
or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it. 6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License. 7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program. If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice. This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License. 8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License. 9. The
Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns. Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

End of terms and conditions

How to Apply These Terms to Your New Programs

If you develop a new program, and you
want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms. To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found. one line to give the program\'s name and an idea of what it does. Copyright (C) yyyy name of author This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version. This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details. You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place - Suite 330, Boston, MA 02111-1307, USA. Also add information on how to contact you by electronic and paper mail. If the program is interactive, make it output a short notice like this when it starts in an interactive mode: Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w\'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c\' for details. The hypothetical commands `show w\' and `show c\' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w\' and `show c\'; they could even be mouse-clicks or menu items--whatever suits your program. You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names: Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision\' (which makes passes at compilers) written by James Hacker. signature of Ty Coon, 1 April 1989 Ty Coon, President of Vice This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

* This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

* The implementation was written so as to conform with Netscapes SSL.
This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used.

This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgement:

    "This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)"

The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related :-).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:

    "This product includes software written by Tim Hudson (tjh@cryptsoft.com)"
* THIS SOFTWARE IS PROVIDED BY ERIC YOUNG ``AS IS'' AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

* The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

Glenn Randers-Pehrson
Willem van Schaik

libpng versions 0.89, June 1996, through 0.96, May 1997, are Copyright (c) 1996, 1997 Andreas Dilger

Distributed according to the same disclaimer and license as libpng-0.88, with the following individuals added to the list of Contributing Authors:

John Bowler
Kevin Bracey
Sam Bushell
Magnus Holmgren
Greg Roelofs
Tom Tanner

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995, 1996 Guy Eric Schalnat, Group 42, Inc.

For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals:

Andreas Dilger
Dave Martindale
Guy Eric Schalnat
Paul Schmidt
Tim Wegner

The PNG Reference Library is supplied "AS IS". The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or
consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.
2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.
3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

A "png_get_copyright" function is available, for convenient use in "about" boxes and the like:

    printf("%s",png_get_copyright(NULL));

Also, the PNG logo (in PNG format, of course) is supplied in the files "pngbar.png" and "pngbar.jpg (88x31) and "pngnow.png" (98x31).

Libpng is OSI Certified Open Source Software. OSI Certified Open Source is a certification mark of the Open Source Initiative.

All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.
(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

END OF TERMS AND CONDITIONS
Terms you should know

Avaya Communication Server 1000
Your office communication system.

Calling Party Name Display
Information appearing on the LCD display screen, such as the caller’s name and telephone number. The system must have CPND enabled.

Category 5 (Cat5)
Cable and associated connecting hardware capable of transmitting at speeds up to 100 MHz, used by 10BaseT, 100BaseT4, 100BaseTX.

Category 5e (Cat5e)
Most Cat5 cable manufactured after 1996 also supports 1000BaseT (GigE) installations, and is designated Cat 5e. Cat5e cable normally has four pairs of copper wire.

Category 6 (Cat6)
Cable and associated connecting hardware capable of transmitting at speeds up to 200 MHz. Designed specifically to support 1000BaseT (Gig Ethernet (GigE)), it is also compatible with 10BaseT, 100BaseT4, and 100BaseTX installations. The cable normally has four pairs of copper wire.

Context-sensitive soft keys
A set of keys programmed by your system administrator. These four keys, located directly below the display area, have four programmable layers. These keys are also used to configure parameters in the Telephone Options menu.

Date/time display
The current date and time when the telephone is in an idle state.
Terms you should know

**Directory Number (DN)**

A number consisting of one to seven digits for a telephone, and also known as an *extension number*.

**Feature display**

An area that shows status information about the feature in use. It also displays the name and status of the active session.

**Feature Status Lamp indicator**

An LCD or an LED that indicates a data message, contact, or feature status by a flash, wink, steady on, or off.

**Fixed key**

The hard-labeled keys on your telephone.

**Flexible Feature Codes (FFC)**

Specialized codes entered using the dialpad that enable features (for example, Ring Again).

**Goodbye key**

A fixed key used to end an active call.

**Indicator**

An LCD or an LED that indicates the status of a feature by the flash, wink, steady on, or off.

**Information display**

Any display of call activity, lists, prompts, and status of calls. On your Avaya 1120E IP Deskphone, this information area is one line of text and symbols. If a text message exceeds this area, a scroll arrow icon indicates that you must use the scroll keys to view the remaining text.
Information line
A one-line by 24-character area that displays date and time or application information.

Interrupted dial tone
A broken or pulsed dial tone that sounds when you access some features on your telephone.

Message/Inbox
A fixed key on your Avaya 1120E IP Deskphone that connects to your voice messaging system when the key is pressed.

Navigation keys
Keys used to scroll through menus and lists appearing on the LCD display screen.

Off-hook
Any line selected to make a call or receive an incoming call. The term off-hook is applied when (a) the end-user lifts up the handset, (b) the end-user presses a line key, (c) the call is automatically answered at the telephone, or (d) a line is automatically selected for an outgoing call.

Paging tone
A special tone (two beeps followed by dial tone) that sounds when you use the Radio Paging feature.

Ringback/ring tone
A sound indicating that a call you have made is ringing at its destination.

Services key
A fixed key used to access options such as Telephone Options, Password Admin, Virtual Office Login, Virtual Office Logout, Test Local Mode, and Resume Normal Mode.
Terms you should know

Shared Directory Number
A DN (extension) that is shared by two or more persons.

Special Prefix code (SPRE)
Special codes entered using the dialpad, followed by a two-digit access code, that enable features (for example, Call Forward All Calls requires entry of SPRE code + 74).

Special dial tone
The three consecutive tones followed by dial tone that you hear when accessing telephone features.

Station Control Password (SCPW)
Enables security features on your phone to prevent others from making calls from your telephone and to prevent access to protected features (for example, Remote Call Forward).

Status Messages
A message displayed to inform the user of important information. A right arrow appears if more than one Status Message is present. Examples of Status Messages include: Message Waiting, All Lines Forwarded to: 6453, Do Not Disturb On, Ring Again active, and Ringer is OFF.

System or Switch
Your office communication system.

Switchhook
A button on which the handset presses down, disconnecting your call when you replace the handset. The handset (when lifted) releases the switchhook, and you either answer an incoming call or you receive a dial tone to make a call.
**User interface**

Screen displays that interact with the end user as a result of an action or event.

**Visual Alerter/Message Waiting indicator**

An LCD or an LED that flashes to indicate that a message is waiting or when the ringer is on.
